

O.R. TRAX DELIVERS MEASURABLE OPERATIONAL GAINS FOR LEADING OPHTHALMOLOGY CLINICS AND EYE SURGERY CENTERS

High-volume eye care providers use O.R. TRAX to streamline vendor access, protect surgical schedules, and strengthen compliance without slowing patient flow.

SAN DIEGO, CA, UNITED STATES, March 5, 2026 /EINPresswire.com/ -- O.R. TRAX, the healthcare industry's leading platform for [surgical vendor communication and credentialing](#), announced today that a growing number of ophthalmology clinics and eye surgery centers are achieving significant operational and compliance gains using its touchless, cloud-based solution.

High-volume ophthalmology environments face unique challenges. Tight surgical schedules, rapid case turnover, and frequent vendor interaction leave little room for administrative friction

“

OR TRAX has made vendor credentialing a streamlined, intuitive process for our team. It is easy to use, saves meaningful administrative time, and runs reliably in the background”

*Maureen Kissinger,
Administrator for Bucci Vision*

or compliance gaps. O.R. TRAX was designed to eliminate those risks by ensuring every vendor representative entering a clinical or surgical environment is fully credentialed, properly notified, and ready to support patient care.

Ophthalmology organizations currently realizing value from O.R. TRAX include Mann Eye Institute, NVISION Eye Centers, Bucci Vision, and Overland Park Eye Surgery Center, with additional practices expected to join throughout the year.

BUILT FOR THE REALITIES OF HIGH-VOLUME EYE CARE

Ophthalmology clinics and ambulatory eye surgery centers often manage dozens of procedures per day, supported by device representatives, pharmaceutical vendors, and service partners. Traditional vendor management methods rely on emails, phone calls, paper logs, or manual badge checks, which introduce risk and delay.

O.R. TRAX replaces these fragmented workflows with a single automated system that provides:

- Real-time vendor credential verification before access is granted
- Running monthly exclusion screening on all vendors
- Automated surgical schedule notifications so vendors arrive prepared and on time
- Touchless digital check-in without kiosks, printers, or hardware
- Centralized compliance reporting for audits and accreditation reviews

The result is a smoother surgical day, fewer delays, and less administrative burden on clinical staff.

PROTECTING SURGICAL FLOW AND PATIENT EXPERIENCE

In ophthalmology, even minor disruptions can cascade into delays that impact patient satisfaction and revenue. A late or unprepared vendor can slow case turnover, push procedures past scheduled blocks, or force rescheduling.

By automating communication and enforcing credential compliance upfront, O.R. TRAX helps clinics and surgery centers maintain predictable surgical flow while safeguarding patient safety.

"Ophthalmology practices cannot afford uncertainty on surgery day," said Will Cottrell, VP of Sales at O.R. TRAX. "Our platform ensures the right vendor shows up for the right case, fully credentialed, every time."

EARLY FEEDBACK FROM OPHTHALMOLOGY LEADERS

Early adopters across eye care organizations report meaningful improvements:

- Reduced day-of-surgery disruptions tied to vendor access
- Faster room turnover and fewer schedule delays
- Improved confidence heading into accreditation and compliance reviews
- Less administrative work for front desk, nursing, and OR teams

"OR TRAX has made vendor credentialing a streamlined, intuitive process for our team. It is easy to use, saves meaningful administrative time, and runs reliably in the background so we can stay focused on patient care."

- Maureen Kissinger, Administrator for Bucci Vision

Testimonials like these highlight how O.R. TRAX supports scale, consistency, and operational control across single-site practices and multi-location platforms.

DESIGNED TO SCALE WITH GROWTH AND CONSOLIDATION

As ophthalmology continues to consolidate under regional and national platforms, consistency across locations becomes critical. O.R. TRAX allows leadership teams to standardize vendor access rules while maintaining flexibility for site-specific needs.

Whether supporting a single eye surgery center or a multi-state ophthalmology network, O.R. TRAX provides a unified compliance layer that grows alongside the organization.

PART OF A BROADER HEALTHCARE FOOTPRINT

The ophthalmology expansion builds on O.R. TRAX's rapid national growth across healthcare, including:

- Hundreds of hospitals and surgery centers live nationwide [saving over \\$300,000 per year](#)
- Large integrated delivery networks
- High-volume outpatient surgical specialties

By extending its platform into ophthalmology, O.R. TRAX continues its mission to restore time, confidence, and safety to surgical environments of every size.

□ ABOUT O.R. TRAX

O.R. TRAX is a surgical vendor scheduling and credentialing platform trusted by the nation's most complex health systems. Designed to automate access control, enforce compliance, and improve surgical throughput, O.R. TRAX supports hundreds of hospitals nationwide with zero-hardware deployment and enterprise-wide scalability.
