

SnapFig Launches Custom 3D Photo Keychains Ahead of Mother's Day 2026

The 3D modeling brand introduces a new line of personalized keychains, allowing customers to turn digital family photos into physical 3D miniatures.

NEW YORK, NY, NY, UNITED STATES, March 6, 2026 /EINPresswire.com/ -- [SnapFig](#), a brand specializing in customized 3D modeling and printing, has announced the launch of its new line of [custom 3D keychains](#). The product line is being introduced ahead of the Mother's Day season to provide a personalized alternative in the consumer gifting market.

Industry trends indicate a growing consumer preference for customized items over mass-produced goods, particularly for milestone holidays. With the increasing digitization of photography, SnapFig aims to provide a physical medium for digital memories. The company utilizes advanced 3D modeling technology combined with expert hand-crafting techniques to produce these portable figures directly from everyday photographs.

“

Our goal is to capture the warmth of a smile and the unique bond of a family, turning a simple photo into a piece of art you can carry everywhere.”

SnapFig CEO

“Our goal is to capture the warmth of a smile and the unique bond of a family, turning a simple photo into a piece of art you can carry everywhere,” said a spokesperson for SnapFig.

The custom miniatures are designed to serve as tangible reminders for family members. Customers can choose to have their photographs styled in various artistic

interpretations, such as the company's signature "Chibi" design. To ensure suitability for daily use as a portable keychain, the figures are manufactured using high-density, durable resin materials designed to maintain structural integrity and color vibrancy over time.

SnapFig's custom 3D keychains transform everyday photos into exclusive, portable memories for Mother's Day.

The final 3D figures are then packaged in presentation boxes, offering a ready-to-present solution for holiday events. The ordering process is fully digitized to streamline the customer experience. Users upload a photograph to the SnapFig platform and select their preferred art style. The company's digital artists then create a custom 3D model, which undergoes a strict quality check before being physically manufactured and shipped.

The new custom 3D keychains are currently available for order on the SnapFig website, expanding the brand's existing catalog of personalized lifestyle products, which includes custom desk figures and event displays.

About SnapFig:

SnapFig is a brand specializing in custom 3D figurines and personalized keepsakes. With a focus on transforming digital images into physical items, SnapFig offers a variety of artistic styles, including Chibi, Pixar, Block, and Realistic designs. From wedding cake toppers to portable keychains, SnapFig delivers customized art pieces to customers globally.
