

Nuclear Battery Market 2026: Emerging Energy Technologies in Focus

*The Business Research Company's
Nuclear Battery Global Market Report
2026 - Market Size, Trends, And Global
Forecast 2026-2035*

LONDON, GREATER LONDON, UNITED
KINGDOM, March 6, 2026

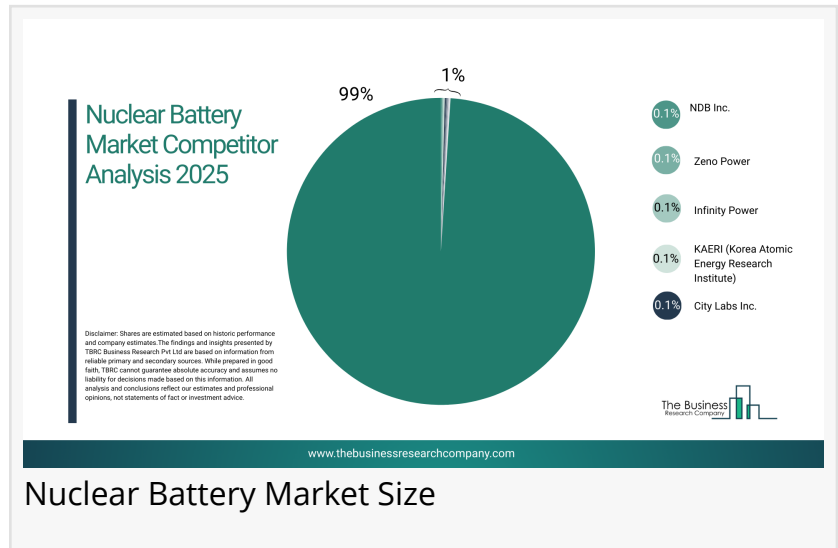

/EINPresswire.com/ -- [The nuclear battery market](#) is dominated by a combination of advanced nuclear technology developers, specialized energy storage companies, and semiconductor manufacturers focusing

on long-duration and maintenance-free power solutions. Companies are prioritizing the development of high-efficiency betavoltaic and radioisotope-based battery technologies, leveraging advanced semiconductor materials such as silicon carbide and diamond to enhance energy conversion efficiency, durability, and safety. Strategic investments in miniaturization,

radiation shielding, and encapsulation technologies are enabling the deployment of nuclear batteries in critical applications including medical implants, aerospace systems, remote sensing devices, and defense equipment.

division of the company, which is directly involved in the nuclear battery market, provides advanced nano-diamond betavoltaic battery solutions designed for long-duration and maintenance-free power generation. Its product portfolio includes compact nuclear batteries, energy conversion modules, and integrated power solutions that support critical applications such as medical implants, aerospace systems, remote sensing devices, industrial monitoring equipment, and defense electronics.

[Which Market Player Is Leading the Nuclear Battery Market?](#)

• According to our research, NDB Inc. led global sales in 2024 with a 0.02% market share. The nuclear battery

Who Are The Major Players In The Nuclear Battery Market?

Major companies operating in the nuclear battery market are NDB Inc., Zeno Power, Infinity Power, Korea Atomic Energy Research Institute, City Labs Inc., BetaBatt, Inc., Widetronix, Inc., Nusano, Inc., Qynergy Corporation, Direct Kinetic Solutions, NANO Nuclear Energy Inc., Atomiq Inc., Betavolt Technology, Beijing Betavolt New Energy Technology.

How Concentrated Is The Nuclear Battery Market?

The market is fragmented, with the top 10 players accounting for 0.08% of total market revenue in 2024. This level of concentration reflects high technological and regulatory entry barriers, driven by strict nuclear safety regulations, radioisotope handling requirements, advanced semiconductor design, and the need for reliable long-duration power solutions, limiting entry to specialized and well-established companies. Leading players such as NDB Inc., Zeno Power, Infinity Power, Korea Atomic Energy Research Institute, City Labs Inc., BetaBatt, Inc., Widetronix, Inc., Nusano, Inc., Qynergy Corporation, Direct Kinetic Solutions hold notable market shares through advanced betavoltaic and radioisotope battery technologies, strong research and development capabilities, strategic government and defense partnerships, and specialized manufacturing expertise. As demand for long-duration, maintenance-free power solutions increases across aerospace, medical, defense, and remote monitoring applications, continued innovation, regulatory compliance, and strategic collaborations are expected to strengthen the competitive positioning of these leading companies in the nuclear battery market.

- Leading companies include:
 - o NDB Inc. (0.02%)
 - o Zeno Power (0.01%)
 - o Infinity Power (0.01%)
 - o KAERI (Korea Atomic Energy Research Institute) (0.01%)
 - o City Labs Inc. (0.01%)
 - o BetaBatt, Inc. (0.01%)
 - o Widetronix, Inc. (0.01%)
 - o Nusano, Inc. (0.01%)
 - o Qynergy Corporation (0.01%)
 - o Direct Kinetic Solutions (DKS) (0.002%)

Who Are The Key Raw Material Suppliers In The Nuclear Battery Market?

- Major raw materials suppliers in the nuclear battery market include 3M Company, BASF SE, Umicore N.V., Albemarle Corporation, American Elements Inc., Materion Corporation, Merck KGaA, Sigma-Aldrich Corporation, Solvay Societas Europaea (Solvay S.A.), DuPont de Nemours Inc., Johnson Matthey Public Limited Company, Saint-Gobain S.A., Arkema S.A., Toray Industries Incorporated, H.C. Starck Tungsten GmbH, Showa Denko Kabushiki Kaisha (Showa Denko K.K.),

Cabot Corporation, Clariant International Limited, Advanced Nano Products Company Limited, Nanoshel LLC, Nanophase Technologies Corporation, Inframat Advanced Materials LLC, and Treibacher Industrie AG.

Who Are The Major Wholesalers And Distributors In The Nuclear Battery Market?

- Major wholesalers or distributors in the nuclear battery market include Grainger Industrial Supply, Fastenal Company, MSC Industrial Direct Co. Inc., RS Components Limited, Motion Industries Inc., Avnet Inc., Arrow Electronics Inc., Allied Electronics & Automation, Digi-Key Electronics, TTI Inc., Mouser Electronics Inc., Newark (element14), Electrocomponents Public Limited Company, Tech Data Corporation, Wesco International Inc., Sonepar Group, Distrelec Group AG, Rutronik Elektronische Bauelemente GmbH, Future Electronics Inc., Heilind Electronics Inc., Anixter International Inc., Bisco Industries Inc., Powell Electronics Inc., PEI-Genesis Inc., and Richardson Electronics Ltd.

Who Are The Major End Users Of The Nuclear Battery Market?

- Major end users in the nuclear battery market include National Aeronautics and Space Administration (NASA), European Space Agency (ESA), Roscosmos State Corporation for Space Activities, Indian Space Research Organisation (ISRO), Japan Aerospace Exploration Agency (JAXA), United States Department of Defense (DoD), Lockheed Martin Corporation, Northrop Grumman Corporation, The Boeing Company, General Electric Company, Rolls-Royce Holdings Public Limited Company, Westinghouse Electric Company Limited Liability Company, BAE Systems Public Limited Company, Raytheon Technologies Corporation, Airbus Societas Europaea, Ball Aerospace & Technologies Corporation, Honeywell Aerospace, Safran Société Anonyme, Toshiba Energy Systems & Solutions Corporation, Hitachi Limited, and Mitsubishi Heavy Industries Limited.

What Are the Major Competitive Trends In The Market?

- Radioisotope-based electrochemical nuclear batteries are transforming the nuclear battery market by delivering reliable, high-density, and long-duration power for mission-critical and remote applications.
- Example: In June 2024, Infinity Power Solutions Inc. launched a high-efficiency nuclear battery featuring a novel radioisotope-based electrochemical energy conversion method designed to provide compact, long-lasting energy for remote sensors, medical implants, and aerospace systems.
- Its compact design, enhanced energy density, and ability to deliver stable power for decades without recharging reduce maintenance requirements, improve operational reliability, and enable uninterrupted performance in extreme and inaccessible environments.

Which Strategies Are Companies Adopting To Stay Ahead?

- Electrochemical Energy Conversion Enhancing Nuclear Battery Efficiency
- Miniaturized Betavoltaic Batteries Enabling Long-Life Civilian Applications
- Next-Generation Betavoltaic Nuclear Batteries Delivering Stable Power In Extreme And Remote Environments

- Strategic Investments Expanding Nuclear Battery Commercialization And Manufacturing Capabilities

Learn More About The Business Research Company

The Business Research Company (www.thebusinessresearchcompany.com) is a leading market intelligence firm renowned for its expertise in company, market, and consumer research. We have published over 17,500 reports across 27 industries and 60+ geographies. Our research is powered by 1,500,000 datasets, extensive secondary research, and exclusive insights from interviews with industry leaders.

We provide continuous and custom research services, offering a range of specialized packages tailored to your needs, including Market Entry Research Package, Competitor Tracking Package, Supplier & Distributor Package and much more.

Disclaimer: Please note that the findings, conclusions and recommendations that TBRC Business Research Pvt Ltd delivers are based on information gathered in good faith from both primary and secondary sources, whose accuracy we are not always in a position to guarantee.
