

BCYW Foundation Champions Targeted Awareness, Research, and Early Detection on International Women’s Day 2026

Empowering Tomorrow Through the Strength of Awareness

DENVER, CO, UNITED STATES, March 9, 2026 /EINPresswire.com/ -- On this International Women’s Day 2026, the [Breast Cancer in Young Women Foundation \(BCYW Foundation\)](#) reaffirms its steadfast commitment to raising awareness, advancing research, and promoting early detection of breast cancer in young women worldwide. Recognizing that breast cancer in younger women often presents unique biological features and survivorship challenges, the Foundation highlights the urgent need for targeted strategies and global collaboration.

On International Women’s Day 2026, the Breast Cancer in Young Women Foundation continues its commitment to raising targeted awareness, promoting early detection, and supporting research for breast cancer in young women worldwide. The Foundation advocates for stronger global collaboration to address the unique biological and survivorship challenges faced by younger patients while empowering women with knowledge, access to screenings, and support. Together, we can create a future where every

BCYW Foundation's Invitation To Join The Journey and Contribute

young woman—our daughters and granddaughters—lives free of breast cancer.

Through targeted education, advocacy, and community engagement, the BCYW Foundation empowers women with knowledge, access to screening, and comprehensive support systems. By fostering international partnerships among researchers, healthcare providers, and patient communities, the Foundation seeks to accelerate progress in early diagnosis, effective treatment, and long-term survivorship for young women affected by this disease.

“Every young woman deserves timely access to life-saving information, innovative treatment, and ongoing support – but all this starts with timely awareness,” said Dr. Rakesh Kumar, Founder and CEO of the BCYW Foundation. Together, the BCYW Foundation and its global partners are working toward a world where awareness, research, and care come together to ensure healthier, longer lives for young women everywhere.

About the BCYW Foundation

The BCYW Foundation is the leading research- and academically focused global organization dedicated solely to breast cancer in young women. Founded three years ago, it unites a diverse network of scientists, oncologists, surgeons, survivors, NGOs, and partners from 30 countries. The Foundation advances progress by providing scientific leadership, generating evidence, and fostering international collaboration. Grounded in thorough scholarship and aligned with the Foundation’s broader scientific leadership—including the peer-reviewed, open-access [Journal of Young Women Breast Cancer and Health](https://journals.lww.com/ywbc/) (YCBH, <https://journals.lww.com/ywbc/>)— the BCYW Foundation reflects our commitment to advancing evidence, influencing international discussions, and driving progress in the field. More recently, the BCYW Foundation launched The [Youth Council for Breast Health](https://ycbh.org/) (<https://ycbh.org/>), a global initiative to transform the future of young women’s health at campuses by raising awareness about breast health, breast cancer symptoms, and risk factors.
