

VOCIC Reflects on a Successful Showcase at Medtrade 2026

Innovative Mobility Solutions and Strong Industry Engagement Highlight VOCIC's Presence at Medtrade 2026

PHOENIX, AZ, UNITED STATES, March 13, 2026 /EINPresswire.com/ -- [VOCIC](https://www.vocic.com) recently concluded a successful appearance at Medtrade 2026, one of the leading events in the U.S. home medical equipment industry. Held on March 3–4, the exhibition brought together mobility solution providers, distributors, and retailers from across the country.

At Booth #533, the VOCIC team welcomed mobility aids distributors, retailers, and long-time partners from across the United States. The event created a valuable opportunity to reconnect with familiar faces while also opening the door to new partnerships.

ACEturn Mobility Scooter: A Closer Look at Innovation and Safety

One of the biggest highlights at the VOCIC booth was the ACEturn Mobility Scooter, which quickly became a focal point for visitors exploring new mobility technologies.

Throughout the exhibition, industry professionals stopped by to take a closer look at the scooter's design and safety features. Some visitors carefully examined the frame and control panel, while others asked detailed questions about stability, battery life, and everyday usability.

"This design is impressive," one distributor remarked while testing the scooter's controls. "You can tell a lot of thought went into the safety and engineering." The ACEturn scooter's innovative design and high safety standards sparked meaningful conversations with distributors looking for reliable mobility solutions for their customers.

[PackGo Rollator Walker](#): Compact Design That Surprised Visitors

The PackGo Rollator Walker also attracted a steady stream of visitors curious about its compact structure and portability.

During demonstrations at the booth, many attendees were surprised to see how easily the rollator could fold and be stored. Several distributors picked up the folded unit themselves, testing its weight and portability. "That's much smaller than I expected," one visitor commented while examining the folded design. "This would be great for travel or small living spaces." Its ultra-compact folding mechanism and convenient storage capability quickly became a popular talking point among distributors seeking practical mobility solutions that fit modern lifestyles.

Electric Lift Chairs: Comfort and Home Care Support

VOCIC's Electric Lift Chairs also generated strong interest among healthcare equipment professionals and home care providers.

Visitors often sat down to experience the chairs firsthand, testing the lifting function and discussing how the product could support seniors and individuals with limited mobility. "This could really make daily life easier for many families," one attendee shared after trying the lift function. The chairs' comfort, safety features, and suitability for home care environments resonated strongly with distributors focused on solutions that help seniors maintain independence at home.

Featured Presentation at CRT Live Talk

During the exhibition, VOCIC also participated in the CRT Live Talk session hosted by the event. VOCIC invited mobility scooter partner Gary to deliver a special presentation on the ACEturn Mobility Scooter. In his talk, Gary shared insights into the product's design philosophy, key features, and real-world user applications, offering attendees a deeper understanding of how the solution supports everyday mobility.

The session sparked active engagement from the audience and received enthusiastic responses from industry professionals attending the talk.

A Dynamic Booth with Meaningful Industry Conversations

With live product demonstrations, hands-on experiences, and in-depth conversations with healthcare equipment professionals, the VOCIC booth maintained a lively and engaging atmosphere throughout the exhibition.

The strong feedback received during the event once again highlighted the growing demand for innovative mobility solutions in the U.S. market, particularly products that combine thoughtful

design with real-world usability.

Looking Ahead

The success of Medtrade 2026 reinforces VOCIC's commitment to delivering high-quality mobility solutions and building strong partnerships across the industry. VOCIC looks forward to continuing its collaboration with distributors, partners, and industry friends—and to reconnecting with the community again at Medtrade 2027.
