

# Deborah Wilson, MD & Associates Ranked #1 in Arizona for EmpowerRF Treatments Featuring Morpheus8V & VTone

*Scottsdale women's health practice recognized for leadership in pelvic floor therapy, vaginal rejuvenation, and non-surgical women's wellness treatments*

SCOTTSDALE, AZ, UNITED STATES, March 13, 2026 /EINPresswire.com/ -- [Deborah Wilson, MD &](#)

“

Our goal has always been to provide women with effective, medically guided solutions that improve both health and quality of life”

*Dr. Deborah Wilson, founder of Deborah Wilson, MD & Associates*

[Associates](#), a Scottsdale-based women's health practice led by board-certified gynecologist Dr. Deborah Wilson, has been recognized as the #1 provider in Women's Health for EmpowerRF treatments in 2025, highlighting the practice's leadership in advanced pelvic health technology and minimally invasive women's wellness treatments.

EmpowerRF is a leading technology platform designed to address a range of women's health concerns through targeted radiofrequency and muscle stimulation therapies. At Deborah Wilson, MD & Associates, treatment protocols

focus specifically on [Morpheus8 V](#) and [V Tone](#), two innovative therapies that support pelvic floor therapy, vaginal tissue health, urinary incontinence treatment, and intimate wellness.

These treatments are increasingly sought by women experiencing symptoms related to pelvic floor weakness, vaginal laxity, hormonal changes, childbirth, and aging, offering non-surgical solutions that support improved function and quality of life.

Morpheus8 V is a minimally invasive vaginal rejuvenation treatment that combines microneedling with radiofrequency energy to stimulate collagen production and improve tissue remodeling. The treatment helps improve vaginal tissue tone, elasticity, and structural support while promoting long-term vaginal health.

V Tone is a non-invasive pelvic floor therapy that uses electrical muscle stimulation to strengthen pelvic floor muscles. Strengthening these muscles can help improve bladder control, reduce symptoms of urinary leakage, and support pelvic stability and intimate wellness.

Being ranked #1 in Women's Health for EmpowerRF treatments reflects the practice's commitment to clinical excellence, innovation in women's healthcare, and a patient-centered approach to treating sensitive health concerns.

"Our goal has always been to provide women with effective, medically guided solutions that improve both health and quality of life," said Dr. Deborah Wilson, founder of Deborah Wilson, MD & Associates. "Many pelvic health concerns, such as urinary leakage or vaginal changes after childbirth, are very common but often underdiscussed. Technologies like Morpheus8 V and V Tone allow us to offer non-surgical treatment options that help women restore confidence, comfort, and overall wellness."

Dr. Wilson brings decades of experience in gynecology and women's health and is known for integrating advanced medical technologies with personalized patient care. Her Scottsdale practice focuses on helping women address pelvic health concerns, hormonal changes, and other wellness needs through evidence-based treatment plans.

With the growing demand for non-surgical pelvic health treatments and vaginal rejuvenation procedures, EmpowerRF technologies such as Morpheus8 V and V Tone are becoming an important part of modern women's healthcare.
