Current Size and Growth Outlook of the Portable Toilet Rental Market

The portable toilet rental market has experienced robust growth over recent years. It is projected to increase from \$21.25 billion in 2025 to \$23.17 billion in 2026, marking a compound annual growth rate (CAGR) of 9.0%. This expansion during the historical period can be linked to the rise in construction activities, more frequent outdoor

events, greater attention to public hygiene, growth in temporary infrastructure, and early adoption of portable sanitation solutions.

Looking ahead, the market is expected to continue its strong growth path, reaching \$32.5 billion by 2030, with an anticipated CAGR of 8.8%. Factors driving this growth include an intensified focus on sanitation accessibility, ongoing infrastructure development, increasing demand for

outdoor recreational event support, stricter hygiene regulations, and a growing dependence on mobile sanitation systems. Key trends influencing the forecast include rising demand for temporary sanitation options, wider use of portable toilets at outdoor events, expanded sanitation needs at construction sites, greater emphasis on hygienic portable facilities, and increasing use of specialized toilet variants.

Understanding Portable Toilet Rental and Its Typical Uses

Portable toilet rental involves providing mobile toilet units that are commonly deployed in outdoor parking areas, construction zones, and other work environments lacking indoor plumbing. These units are also widely used at large outdoor gatherings such as festivals, concerts, and recreational events. Portable toilets are designed to offer basic restroom facilities, typically including a toilet, urinal, and hand sanitizer dispenser mounted on the wall.

Rising Travel and Tourism as a Growth Catalyst for Portable Toilet Rentals

One of the primary factors driving growth in the portable toilet rental market is the rising demand for travel and tourism. Travel and tourism encompass activities where people visit various places for leisure, recreation, business, or other purposes. The surge in travel-related spending has led to higher sales in the portable toilet market, as more travelers require convenient restroom access. For example, data released in May 2023 by UN Tourism—a specialized agency of the United Nations focused on accessible tourism—highlighted that international arrivals in the first quarter of 2023 reached 80% of pre-pandemic levels. Approximately 235 million tourists traveled internationally during this period, more than double the number from early 2022. This considerable rebound in travel is directly fueling the demand for portable sanitation facilities.

Dominant Regional Player in the Portable Toilet Rental Market

In 2025, Asia-Pacific emerged as the largest region within the portable toilet rental market. The overall market analysis includes key regions such as Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa. Among these, Asia-Pacific is expected to maintain its leading position due to factors like rapid urbanization, expanding infrastructure projects, and increasing outdoor event activities.
