

Your Invisible World Announces Music Project Exploring Outer Space, Alien Encounters, Space UFO Reports and the Pyramids

Artist Reveals Thought Provoking Music Inspired by Alien Encounters, Space UFO Sightings and Mysteries of the Pyramids

CLEVELAND, OH, UNITED STATES, March 26, 2026 /EINPresswire.com/ -- The music project Your Invisible World is drawing attention with a creative concept that blends music, observation, and long-standing questions about Outer Space, Space UFO sightings, Alien Encounters, and the ancient Pyramids. Through a combination of music and storytelling, the project explores theories about extraterrestrial life and the possibility that such life may already exist in forms familiar to humans.

The project Your Invisible World currently features six original compositions available online, with a full album scheduled for release on April 15 2026. The music explores themes connected to Outer Space, Alien Encounters, and the possibility that extraterrestrial life could exist quietly within human environments.

The concept behind the project centers on a question that has continued to spark debate among scientists, historians, and the public for decades: Are humans alone in the universe. The project revisits the topic in light of renewed public interest during early 2026, when discussions about unidentified aerial phenomena and military reports once again pushed the subject of Space UFO activity into global conversations.

Within its themes, Your Invisible World also references historical mysteries connected to the Pyramids. Ancient cave drawings and pyramid inscriptions have long fueled theories suggesting

that early civilizations may have recorded encounters with beings from Outer Space. While the origins of the Pyramids remain widely debated, imagery found in ancient structures continues to inspire speculation about Alien Encounters and possible connections between early human cultures and advanced visitors.

Another element explored in the project involves the idea often referred to as Pyramid Power. Supporters of the concept claim that the shape and structure of pyramids may influence energy fields or preserve materials in unusual ways. These ideas form part of the thematic direction behind the music and storytelling of Your Invisible World.

Unlike traditional portrayals of extraterrestrial beings in science fiction, the project presents a different perspective. The music imagines alien life forms that appear human and live quietly within society. Rather than presenting frightening creatures, the narrative suggests that if extraterrestrial visitors came to Earth they might adapt to human environments and coexist without drawing attention or creating fear.

The project also incorporates personal observations shared by Bennie D'Agostino, whose experiences helped shape the themes behind Your Invisible World. Among them are unusual events he believes involved unexplained energy forms connected to human life and death. One event he describes dates back to 1985 when he reported seeing what he believed was a corpse like figure with pale green skin and sunken green eyes. According to D'Agostino, the same figure appeared again in 2025 in the same location wearing the same clothing, a sighting that continues to raise questions for him about unexplained phenomena.

Online content supporting the project includes music videos, live performance recordings, and social media updates where listeners can follow the development of the Your Invisible World music project.
