

TuxCare to Feature Extended Lifecycle Support for Open-Source Software at CloudFest 2026

PALO ALTO, CA, UNITED STATES, March 18, 2026 /EINPresswire.com/ -- [TuxCare](#), a global innovator in securing open source, today announced it will exhibit at [CloudFest 2026](#), the world's largest cloud industry event, taking place March 23-26 in Europa-Park, Germany.

Located at booth #R16, TuxCare will feature their recently expanded [Enterprise Linux Support \(ELS\) for Open Source Software](#), giving attendees an opportunity to explore how organizations can maintain security and stability well beyond the end of upstream vendor support. The offering delivers comprehensive, long-term protection across the full open-source software stack, covering a broad and continually growing range of projects, libraries and runtimes.

ELS for OSS is built to identify and remediate risks that traditional security tools often overlook. By automating continuous CVE discovery and integrating remediation directly into patching workflows, the solution uncovers vulnerabilities buried deep within layered dependencies and complex software supply chains. This enables teams to reduce risk exposure across their environments without disrupting development or operations.

Attendees will also see how ELS for OSS integrates seamlessly into existing infrastructure, helping security and IT teams accelerate response times, simplify patching processes, and meet compliance requirements with reduced manual effort. Backed by expert support across KernelCare, LibCare and other TuxCare solutions, the award-winning ELS for OSS solution enables organizations to focus on innovation and business outcomes.
