## [Built and Natural Environment Consulting Market Size and Future Outlook](#)

The market for built and natural environment consulting has expanded significantly, with its value rising from \$72.96 billion in 2025 to an anticipated \$76.84 billion in 2026, representing a compound annual growth rate (CAGR) of 5.3%. This historical growth has been largely driven by rapid urbanization, increased investments in infrastructure, early initiatives on environmental protection, modernization programs in cities, and heightened awareness of ecological sustainability.

Looking ahead, the market is forecasted to grow further to reach \$94.23 billion by 2030,

maintaining a CAGR of 5.2%. This expansion will be supported by the advancement of sustainable city projects, broader climate adaptation planning, rising demand for environmentally friendly infrastructure, the integration of smart city technologies, and the strengthening of environmental governance. Significant trends during this period include a greater focus on climate-resilient urban development, the adoption of integrated sustainable city planning, increased use of nature-based infrastructure solutions, growth in environmental compliance and assessment, and emphasis on green building practices and resource efficiency.

### Understanding Built and Natural Environment Consulting Services

Built and natural environment consulting entails providing expert guidance and services related to the sustainable development, management, and preservation of built infrastructure and natural ecosystems. These consulting services play a vital role in creating well-organized, functional urban spaces that improve residents' quality of life while optimizing resource use and supporting ecological balance.

### Core Factors Propelling Growth in the Built and Natural Environment Consulting Market

One of the main drivers for market growth is the expansion of the infrastructure sector. The collaboration between infrastructure development and consulting services in this area is essential for building sustainable, resilient, and functional communities. This close relationship ensures that infrastructure projects align with sustainability goals and community needs while remaining practical and cost-efficient.

For example, in 2023, USAFacts, a US-based nonpartisan organization providing accessible government data, reported that highway transportation accounted for about 44% of federal transportation and infrastructure spending that year, with air travel making up 23%. Rail and mass transit investments accounted for 22%, while water infrastructure made up 10%. Additionally, the federal government allocated \$44.8 billion toward infrastructure in 2023, with states receiving an extra \$81.5 billion. This significant investment highlights how infrastructure demand is a key catalyst for the growth of the built and natural environment consulting market.

### Regions Leading the Built and Natural Environment Consulting Market

In 2025, North America held the position as the largest regional market for built and natural environment consulting. However, the Asia-Pacific region is expected to experience the fastest growth throughout the forecast period. The market report covers multiple regions, including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a global perspective on market dynamics and opportunities.
