

# Mach2 Expands Private Aviation Access with Rapid Growth of EmptyLegFinder Platform

*Dual-platform strategy combines 450+ operators with a fast-growing empty leg marketplace offering 1,500+ live flights and real-time access.*

NEW YORK, NY, UNITED STATES, March 18, 2026 /EINPresswire.com/ -- [Mach2](#), the live bidding and charter connectivity platform for private aviation, today announced the continued expansion of its ecosystem with the rapid growth of its sister platform, [EmptyLegFinder.aero](#), a dedicated solution for real-time empty leg discovery.

Luxury Jet

Since its launch in February 2026, EmptyLegFinder has recorded over 400% week-on-week subscription growth, reflecting strong demand for simplified and transparent access to private jet availability.

“

Mach2 and EmptyLegFinder were built to remove friction and make private aviation faster, clearer, and more accessible.”

*Zaher Deir, CEO and founder*

A MARKET DEFINED BY OPPORTUNITY — LIMITED BY VISIBILITY

Private aviation continues to grow globally, with thousands of aircraft operating millions of flights annually, particularly across the United States.

However, inefficiencies remain:

Up to 40% of private jet flights operate as empty legs

Many of these flights are not visible in real time to the wider market

Empty leg opportunities can offer savings of up to 80% compared to standard charter pricing

These dynamics highlight a fundamental issue: availability exists — but visibility does not.

## MACH2: THE FULL CHARTER CONNECTIVITY PLATFORM

Mach2 was developed to address fragmentation by acting as a neutral aggregation layer, connecting operators, brokers, and end users in real time.

With over 450 certified operators onboarded, Mach2 enables:

On-demand one-way and return charter requests

Intelligent operator matching based on aircraft proximity

Direct communication between clients and operators

Full transparency, with no involvement in pricing or transactions

Mach2 functions as infrastructure, enhancing speed, visibility, and efficiency without interfering in commercial relationships.

## EMPTYLEGFINDER: FOCUSED, FAST, AND GROWING

To complement Mach2, EmptyLegFinder.aero was launched as a dedicated empty leg platform, designed for users seeking simplicity and immediate access.

The platform now offers:

1,500+ live empty leg flights

200+ new flights added daily

Strong U.S. coverage, with expanding routes across Canada, Europe, and the Middle East

Smart alerts notifying users when matching routes become available

Full operator contact details, enabling direct booking with no added commissions or markups

EmptyLegFinder operates on a simple subscription model, providing direct access to opportunities without intermediaries.

## TWO PLATFORMS, ONE CONNECTED STRATEGY

Mach2 and EmptyLegFinder are designed to complement each other:

Mach2 provides a full charter ecosystem for on-demand and structured travel

EmptyLegFinder delivers a streamlined experience for users focused purely on empty leg opportunities

Together, they create a layered access model, allowing users to choose between flexibility and precision while improving efficiency across the market.

#### DRIVING A SHIFT TOWARD REAL-TIME ACCESS

The rapid adoption of EmptyLegFinder, combined with Mach2's growing operator network, reflects a broader shift toward real-time visibility, aggregation, and efficiency in private aviation.

"Private aviation lacks visibility. Mach2 and EmptyLegFinder bring clarity, speed, and direct access," said Zaher Deir, Founder of Mach2.

#### ABOUT MACH2

Mach2 is a live bidding and charter connectivity platform designed to connect private jet operators, brokers, and end users in a transparent, efficient, and neutral environment. With over 450 operators onboarded, real-time charter matching, and intelligent search capabilities, Mach2 is redefining how private aviation connects.
