

EM6000Auto Introduces New Category of Trailer Immobilization Technology at MATS 2026

Combining physical trailer immobilization, landing gear automation, and telematics integration, EM6000Auto signals a shift toward preventive fleet security

LOUISVILLE, KY, KY, UNITED STATES, March 25, 2026 /EINPresswire.com/ -- Trinetra Guard is introducing what may represent a new category in trailer security technology with the launch of EM6000Auto at MATS 2026.

□ FROM VISIBILITY TO CONTROL

Over the past decade, telematics has transformed fleet visibility. However, when it comes to cargo theft, most systems still operate after the event.

The industry is moving from visibility to control in trailer security”

Ratan Baid, CEO, Trinetra Guard

EM6000Auto introduces:

- physical trailer immobilization
- automated landing gear
- integrated alerts and monitoring

□ HOW IT WORKS

The system is mounted on the trailer and:

- secures landing gear

- prevents unauthorized movement
- detects unauthorized hook-ups

□ INDUSTRY SHIFT

This represents a move from knowing where a trailer is... to controlling whether it can move.

□ PRESENTATION DETAILS

Friday, March 27

10:10 AM

Pro Talks Stage — East Hall

□ RSVP
