

INNOCN Announces Spring Pricing Updates Across Select Monitor Models on Amazon

LA, CA, UNITED STATES, March 25, 2026 /EINPresswire.com/ -- INNOCN has introduced seasonal pricing adjustments on a selection of monitor models available through Amazon U.S. as part of its spring sales period. The update includes products across multiple categories, including 4K productivity displays, Mini LED gaming monitors, and ultrawide formats.

According to the company, the spring pricing applies to several models designed for different usage scenarios, including home office setups, gaming environments, and multitasking workflows. The adjusted pricing will be available for a limited time, with availability subject to inventory conditions on Amazon.

The advertisement features a green background with the INNOCN logo in the top left and the dates "03.25 - 03.31 (PDT)" in the top right. The main headline is "Spring Sale" in large green font, followed by "Up to 50% off" in a smaller green font. In the center is an image of the INNOCN 25M2S monitor displaying a dragon. Below the monitor, the current price "\$239.99" is shown in bold black text, with the original price "\$399.99" crossed out in a green oval. A green speech bubble on the right contains "\$160 OFF". The model name "25M2S" is displayed in green below the price. At the bottom, the text "24.5 inch mini led 1440p 240hz gaming monitor" is written in a small green font.

Among the models included is the [INNOCN 27C1U-D](#), a 27-inch 4K monitor equipped with a USB-C port. The model supports 60Hz refresh rate operation and is positioned for general productivity and content consumption. The current listed price is \$194.99, compared to a regular price of \$279.99.

The spring update also includes the [INNOCN 25M2S](#), a 24.5-inch Mini LED gaming monitor featuring 1440p resolution and a 240Hz refresh rate. The model is listed at \$239.99, reduced from its regular price of \$399.99.

Another model included in the pricing adjustment is the [INNOCN GA27T1M](#), a 27-inch Mini LED monitor with 1440p resolution and a refresh rate of up to 320Hz. The product is currently listed at \$299.99, compared to a regular price of \$499.99.

For users seeking larger-format displays, the INNOCN 45E3R is also part of the spring pricing update. This model features a 45-inch curved ultrawide panel with 5K2K resolution and a 120Hz refresh rate. The listed price is \$529.99, reduced from \$597.49. Product details are available at: <https://www.amazon.com/dp/B0DFW3PXGM>

INNOCN stated that these pricing updates reflect seasonal adjustments aligned with spring retail activity. The company continues to expand its monitor lineup across gaming, professional, and general-use segments.

Further information regarding specifications and availability can be found on INNOCN's official Amazon storefront.
