

BookFab for Mac Launches, Giving Mac Users Greater Control Over Their Digital Libraries

BookFab launches for Mac, enabling macOS users to convert purchased eBooks and audiobooks to formats such as EPUB, PDF, and MP3.

CA, UNITED STATES, April 28, 2026 /EINPresswire.com/ -- As digital reading becomes more common, many users still face limits caused by closed platforms, restricted formats, and device compatibility issues, especially on Mac, where fewer tools are available for downloading, converting, and managing purchased digital content locally. To address this need, [BookFab](#) has launched its macOS version, enabling users to download and convert titles from major platforms like Kindle, Kobo, and Audible, as well as Japanese services like FANZA and DMM Books. Mac users can now save eBooks, audiobooks, manga, and light novels locally in flexible formats, including EPUB, PDF, MP3, and M4A.
