

Clear Touch Redefines Mobile Broadcasting with the Official Launch of Command Studio

Clear Touch announces Command Studio, an all-in-one, battery-powered broadcast kit that replaces complex studio setups with a portable, touchscreen solution.

GREENVILLE, SC, UNITED STATES, April 2, 2026 /EINPresswire.com/ -- [Clear Touch](#), a leader in interactive technology, announces the official release of the [Command Studio](#). This all-in-one mobile broadcast solution allows schools and businesses to produce professional live video from any location. The system provides a flexible alternative to traditional, fixed-location broadcast studios by housing high-quality video tools in one portable case.

The Command Studio features a central Capture Console with a responsive touchscreen interface. This console serves as the production hub where a single user can switch between camera angles and manage audio levels in real time. The standard kit includes wireless PTZ cameras with 20x optical zoom to capture clear video from across a room. Two wireless lapel microphones are also included to ensure high-quality voice recording without the clutter of cables.

The Clear Touch Command Studio includes a touchscreen Capture Console, wireless PTZ cameras with 20x optical zoom, and lapel microphones, along with a rugged, weather-resistant travel case for transportation and storage.

The Capture Console touchscreen provides a centralized hub to switch camera angles, manage audio levels, and start live streams with a single tap.

Every component in the Command Studio is battery-powered to support up to six hours of

continuous use. This design allows users to broadcast from a classroom, a boardroom, or a lab without needing a wall outlet. The entire system fits into a rugged, weatherproof rolling case with a telescoping handle for easy and secure transportation or storage.

The Command Studio integrates directly with Clear Touch displays and Clear Digital's [Nio](#) through our native Command software. The system is designed for universal compatibility and can be used with any display that connects through an HDMI IN port.

Additionally, other streaming platforms like YouTube, Facebook, or Discord can be linked with the Command Studio, allowing users to broadcast their live stream across multiple digital platforms simultaneously. By using existing infrastructure, IT teams can avoid the costs and technical hurdles of third-party streaming services or external encoders.

The Command Studio is available now through authorized Clear Touch resellers. This solution reflects Clear Touch's commitment to providing accessible technology that helps educators and professionals communicate more effectively. We focus on removing technical barriers so our users can focus on sharing their message.

About Clear Touch®

Clear Touch® is an award-winning leader in interactive technology, offering a full line of interactive panels, software, and accessories for education, business, and government. With a commitment to innovation, quality, and customer support, Clear Touch® provides solutions that enhance collaboration, engagement, and learning in any environment.
