

B3C FUEL SOLUTIONS UNVEILS NEWLY PATENTED NO-MESS OIL CHANGE SYSTEM WITH UNIQUE SOLIDIFYING POLYMER TECHNOLOGY

*OIL LOCK NO MESS OIL CHANGE DISPOSABLE DRAIN BOX CONVERTS OIL TO TRASH READY THROW AWAY SOLID**

CONWAY, SC, UNITED STATES, March 31, 2026 /EINPresswire.com/ -- For decades, there has not been a simple answer to what should be done with the dirty oil from an oil change and the impact is significant.

DIY oil changes have come with several unavoidable problems: Messy drain pans, spills in garages and driveways, and the transportation of the hazardous liquid to disposal sites. According to EPA and DOE data, up to 80% of DIY motor oil—over 300 million gallons—is improperly disposed of each year. Just one gallon of used oil can contaminate up to one million gallons of fresh water.*

NEWLY PATENTED NO MESS OIL CHANGE DISPOSABLE DRAIN BOX CONVERTS OIL INTO A DISPOSABLE TRASH READY SOLID

B3C Fuel Solutions announces a newly patented oil change system and unique polymer that eliminates the used oil disposal issue entirely. The Oil Lock Disposable No-Mess Oil Change system, a first-of-its-kind solution, is as simple as it is disruptive.

Using advanced polymer solidifying technology (not standard absorbent like Perlite), the Oil Lock polymer transforms used motor oil into a solid, non-hazardous, landfill-compliant material—right inside its container, a simple box which doubles as a drain pan. The real innovation is the bag of polymer that captures both oil and filter, transforming the oil into a

solid. This eliminates any questions or issues about messy oil disposal given the Oil Lock polymer converts messy oil that can spill, into a disposable, trash-ready solid*.

Oil Lock has been rigorously tested and meets key environmental safety standards, including Federal TCLP, Aquatic Bioassay Testing, and EPA Filter Liquids Test (SW-846 Method 9095B), confirming it as non-hazardous for disposal.*

"This isn't just an improvement—it's a complete shift," said a B3C spokesperson. "For the first time, people that change oil can confidently dispose of used oil in a non-leaching, non-hazardous manner".

With Oil Lock, spills and the need for oil storage and messy trips to disposal sites is eliminated. It is truly a smarter, cleaner way to change and handle messy, dirty, used oil.

It's also capable of solidifying other hydrocarbons like gasoline, diesel, kerosene, and solvents.

“

This isn't just an improvement in oil handling, it's a complete shift, solving the issue of how to handle used oil. Oil Lock turns the biggest problem associated with oil changes into a non-issue."

B3C Spokesperson

SO NOW WHAT DO I DO WITH THIS OIL?
THAT'S EZ....JUST THROW IT AWAY!

THE NO MESS OIL CHANGE DISPOSABLE DRAIN BOX BOX CONVERT MESSY OIL INTO A DISPOSABLE TRASH READY SOLID

The advertisement consists of two side-by-side photographs. The left photo shows a man in a red cap and safety glasses, looking down at a black oil pan filled with dark, used oil. His grey t-shirt is splattered with oil. The right photo shows the same man smiling, holding a box of 'Oil Lock' product. The box is open, showing a brown, granular absorbent material. The box has text that reads 'EZ OIL CHANGE OIL ABSORBING DISPOSABLE DRAIN BOX' and 'REVOLUTIONARY ABSORBENT CONVERTS OIL IN TO A NON-HAZARDOUS GARAGE FLOOR MATERIAL'. Below the box, there is a black trash bin. The background of both photos is a residential setting with a house and trees.

*Stats from EPA.gov website and Department of Energy (DOE). Visit B3CFuel.com for full test results. Always check with appropriate local, state, federal authorities for disposal requirements.

**URNS OIL INTO SAFE
TO THROW AWAY SOLID***

LANDFILL SAFE!*

BEFORE: MESSY OIL DRAINING INTO DRAIN BOX & POLYMER **AFTER: OIL CONVERTED TO EASY TO DISPOSE OF SOLID***

THE NO MESS OIL CHANGE DISPOSABLE DRAIN BOX
BOX CONVERT MESSY OIL INTO A DISPOSABLE TRASH
READY SOLID

*Always check local, state, federal regulations

The advertisement features a blue header with the main headline in white and yellow. Below the header are two side-by-side photographs. The left photo shows a person in blue gloves using a tool to drain oil from a car's engine into a black plastic container. The right photo shows a hand in a yellow glove holding a pile of brown, granular solid waste. A red box with white text 'LANDFILL SAFE!*' is overlaid on the right photo. At the bottom of the photos is a blue bar with white text describing the 'before' and 'after' states. Below this bar is a white box with black text describing the product. A small 'B3C' logo is visible in the bottom right of the 'before' photo, and a small disclaimer is in the bottom right of the 'after' photo.
