provider of upstream oil and gas capital investment and operations decision software, announced the release of [MOSAIC™ 2026](#), the latest version of MOSAIC™. MOSAIC™ is Omnira Software’s platform for the upstream supporting economics, reserves management, and production forecasting workflows.

MOSAIC 2026 enhances precision, governance, and performance across Economics, Volume Forecasting, Reserves Management, and core platform capabilities. The release reflects continued refinement of core workflows informed by client feedback, helping technical and

commercial teams work more efficiently, scale complex evaluations, and maintain confidence in results.

“MOSAIC 2026 strengthens the analytical foundation our clients depend on for critical decision making,” said Rob Hansen, Chief Product Officer at Omnira Software. “This release enhances precision, improves governance across workflows, and delivers performance gains that support both technical rigor and business outcomes.”

Key enhancements in MOSAIC™ 2026 focus on greater control over economic evaluations, enhanced forecasting precision and visualization, more efficient and scalable reserves workflows, and platform level performance, usability, and security enhancements. Together, these updates help reduce friction in day to day work while supporting accuracy, auditability, and consistency across teams.

“Our focus with MOSAIC 2026 was to enhance the client experience where it matters most,” said Jubril Azeez, Product Director for MOSAIC™ at Omnira Software. “These enhancements help teams move faster, reduce manual effort, and confidently manage increasingly complex E&P asset portfolios.”

Customers are encouraged to contact their Omnira client representative to arrange access to MOSAIC™ 2026 for user acceptance testing.

#### About Omnira Software

Omnira Software provides advanced decision support solutions for the upstream oil and gas industry, helping organizations enhance capital efficiency, manage risk, and make better data driven decisions across the asset lifecycle.
