

Nobel University Launches National Expansion with New Business and Cybersecurity Programs

Accredited university introduces flexible, career-focused programs designed for working adults in Southern California and nationwide

LOS ANGELES, CA, UNITED STATES, April 1, 2026 /EINPresswire.com/ -- Nobel University, an institution accredited by the Transnational Association of Christian Colleges and Schools, a U.S. Department of Education- and CHEA-recognized accrediting body, is formally introducing its academic programs to students across California and the broader United States, marking a new phase of national outreach and expansion for the University.

With a focus on accessibility, flexibility, and career-relevant education, Nobel University currently offers a Bachelor of Arts in Business Administration (BA) and a Master of Business Administration (MBA). These programs are designed to support working professionals, entrepreneurs, and international students seeking practical and flexible degree pathways, with online options available for students across the United States.

Earlier this year, the University soft

launched its Doctor of Business Administration (DBA), providing advanced opportunities for experienced professionals to engage in applied research and leadership development.

Building on this expansion, Nobel University will introduce two new programs in a rapidly growing field:

Bachelor of Science in Cybersecurity (BSCS) — Soft launch: July 2026
Master of Science in Cybersecurity (MSCS) — Soft launch: July 2026

Both programs are scheduled for a full launch in September 2026, aligning with increasing national demand for skilled cybersecurity professionals.

The cybersecurity programs are designed specifically for working adults and are priced to be highly competitive within Southern California and across the broader U.S. higher education market, with a focus on accessibility for working adults.

“At Nobel University, our focus is simple—we provide practical, real-world education that helps people move forward in their careers,” said John Kim, Founder and President of Nobel University. “With the growing demand for cybersecurity professionals, these programs give working adults a flexible and affordable way to build the skills they need and take the next step.”

Nobel University’s academic model emphasizes:

- Flexible program structures designed for working professionals
- Industry-relevant curriculum with applied learning outcomes
- Scalable pathways from undergraduate through doctoral education
- A commitment to accessibility and affordability

As part of this new phase of growth, Nobel University is expanding its national outreach efforts, strengthening its presence in California while actively serving students across the United States through flexible, online and career-focused programs and strategic partnerships.

The launch of its cybersecurity programs represents a significant step in the University’s continued evolution into high-demand, technology-driven fields.

About Nobel University

Nobel University is an accredited higher education institution offering undergraduate, graduate, and doctoral programs in business and emerging fields. The University is accredited by the Transnational Association of Christian Colleges and Schools, a U.S. Department of Education- and CHEA-recognized accrediting body, and is committed to accessibility, innovation, and preparing students for success in a global economy through flexible and career-oriented education.
