

Free AI Webinars Focus on Copilot, Claude, Power Platform

ONLC Training Launches AI Series for Business and IT Teams

WILMINGTON, DE, UNITED STATES, April 1, 2026 /EINPresswire.com/ -- As organizations accelerate adoption of artificial intelligence and automation tools like Microsoft Copilot, Claude AI, and Power Platform, ONLC Training has launched a new AI Webinar Series designed to help teams quickly understand, apply, and scale these technologies in real-world business environments. The series features three free, instructor-led sessions in April, with additional AI webinars planned in the coming months.

Businesses are no longer asking if they should use AI—they're asking how to use it effectively"

Andy Williamson CEO and Co-founder of ONLC Training

"Businesses are no longer asking if they should use AI—they're asking how to use it effectively," said Andy

Williamson, CEO and Co-founder of ONLC Training. "This series focuses on practical applications of tools like Copilot, Claude, and Power Platform so teams can immediately improve productivity, automate workflows, and make better decisions."

LEARN MICROSOFT COPILOT WORKFLOWS, AGENTS, AND AI TRANSFORMATION

The first session, Copilot Workflows, Agents, and AI Transformation: A Microsoft AI Credentials Bootcamp, takes place April 14 at 12:00 PM ET. This 90-minute webinar introduces Microsoft's AI credential paths and how they align with real-world business adoption.

Attendees will explore how Copilot supports everyday workflows, how leaders can drive AI transformation, and how teams can extend Copilot using agents in Copilot Studio. The session highlights Microsoft AI certifications including AB-730T00, AB-731T00, and PL-7008, helping organizations identify the right upskilling path.

CUSTOMIZE CLAUDE AI WITH PLUGINS AND SKILLS FOR REAL WORKFLOWS

On April 21 at 12:00 PM ET, ONLC presents Unpacking Claude Cowork: Plugins and Skills, a 60-minute session focused on customizing AI assistants for real work.

Participants will learn how Claude Copilot works with files, automates repetitive tasks, and delivers completed outputs. The session demonstrates how plugins connect Claude to business systems and how skills create repeatable workflows tailored to roles in marketing, operations, IT, and other knowledge-driven functions.

UNLOCK AUTOMATION AND INSIGHTS WITH MICROSOFT POWER PLATFORM

The third session, Bringing Power Platform to Your Organization: What Your Teams Could Automate, Visualize, and Build Tomorrow, will be held April 23 at 12:00 PM ET. This 60-minute webinar is designed for business leaders and decision-makers evaluating how to better use tools already included in Microsoft 365.

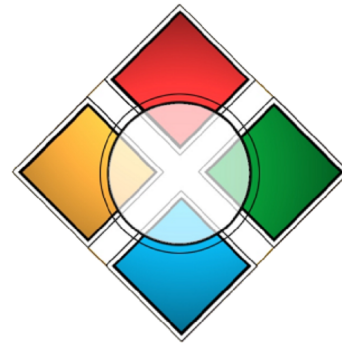

The session explains how Power BI improves data visualization beyond traditional spreadsheets, how Power Automate eliminates manual workflows, and how Power Apps enables teams to build custom business solutions without coding. Attendees will gain real-world examples and a clear understanding of how to introduce Power Platform into their organization for immediate impact.

“AI and automation deliver the most value when they are accessible to the people doing the work,” Williamson added. “Whether it’s Copilot, Claude, or Power Platform, organizations that empower their teams with these tools will move faster and operate more efficiently.”

FREE AI TRAINING WITH A PATH TO CERTIFICATION AND TEAM UPSKILLING

All three webinars are offered free of charge, providing an accessible entry point into AI training, Copilot certification, workflow automation, and business intelligence tools. These sessions connect directly to ONLC’s broader training programs, including certification courses, AI academies, and private team training that can be customized to organizational goals.

Additional AI webinars covering automation, analytics, and AI-powered development will be released in the coming months, giving organizations ongoing opportunities to build AI and digital
