

# Florida Entrepreneur Launches the World's First AI Agent Census™

*As AI agents proliferate across industries, one founder is making sure they're counted — and credentialed*

ORLANDO, FL, UNITED STATES, April 1, 2026 /EINPresswire.com/ -- With an estimated 1 billion AI agents expected to be deployed globally by the end of this decade, one Florida entrepreneur isn't waiting for governments or big tech to keep track. Maryann Kilgallon, Forbes NEXT1000 honoree and founder of SnagaBiz LLC, has launched the [AI Agent Census™](#) — the world's first public directory dedicated to cataloging AI agents across industries, built for Main Street businesses and enterprise alike.

We're entering a world where AI agents will outnumber people. Every agent deserves to be counted. AI Agent Census™ is where that starts."

*Maryann Kilgallon*

Available free at [aiagentcensus.com](https://aiagentcensus.com), the Census allows any

business or developer to list their AI agent with structured data including launch date, AI model, purpose, industry, and a direct link to their platform. Early listings span industries from pool maintenance and salon services to legal education and customer support — a reflection of how rapidly AI is being adopted at the small business level.

"The conversation around AI accountability has been happening at the enterprise and government level. Nobody was building the infrastructure for Main Street. Every AI agent deserves to be counted, and every business deploying one deserves a record of it."

— Maryann Kilgallon, Founder, SnagaBiz LLC & AI Agent Census™

The Census is designed as a companion to Kilgallon's [AI Birth Certificate™](#) ([aibirthcertificates.com](https://aibirthcertificates.com)), which issues official-style AI Birth Certificates™ to document an AI agent's identity, model, purpose, and date of origin. Together, the two platforms form the first known ecosystem for AI agent credentialing and public record — a concept Kilgallon describes as "the birth certificate and the census record, just like the real world."

As AI governance legislation continues to develop at state and federal levels, experts increasingly note the absence of standardized tracking mechanisms for AI agents deployed by small and mid-sized businesses. The AI Agent Census™ positions itself as an early infrastructure solution —

free, open, and accessible to any business operating with AI.

Kilgallon, who also operates Agent Concierge (an AI agency serving local businesses) and Trademark Lady (a trademark education platform), says the Census grew out of a gap she observed firsthand. "My clients are pool companies, salon owners, and barbers deploying AI for the first time. There was no place to register them, no record they existed. I built the place."

#### Pricing & Availability

AI Agent Census™ listing: Free —

available now at [aiagentcensus.com](https://aiagentcensus.com)

AI Birth Certificate™: \$49 — Founding rate of \$29 available for a limited time at [aibirthcertificates.com](https://aibirthcertificates.com)

#### About AI Agent Census™

The AI Agent Census™ is the world's first public directory for AI agents, available free at [aiagentcensus.com](https://aiagentcensus.com). Launched in 2026, the Census tracks AI agents across industries with structured, searchable listings. It is a product of SnagaBiz LLC, based in Orlando, Florida.
