

NeuroAnimation Opens in Lexington, Bringing the World's First Brain Growth Therapy to Kentucky

LEXINGTON, KY, UNITED STATES, April 2, 2026 /EINPresswire.com/ --

[NeuroAnimation](#) - The Brain Regained, an award winning, science-backed, revolutionary therapy center transforming the lives of clients with all manner of brain conditions and injuries is officially coming to Lexington, Kentucky. NeuroAnimation announced its partnership with

“

Our mission is to move beyond traditional rehabilitation. We aren't just managing symptoms; we are targeting vascular stimulation to help the brain repair. Our clients are warriors who are suffering.”

Dr. Omar Ahmad, CEO and Founder of NeuroAnimation

Marshall Pediatric Therapy and the opening of its newest center at 1056 Wellington Way, Suite 130, Lexington, Kentucky. The community is cordially invited to a ribbon-cutting ceremony to be held on April 9th at 2pm to celebrate this milestone in neurological care.

Following the success of its flagship location in New Albany, Ohio, NeuroAnimation is bringing its "wonder, not work" philosophy to the Bluegrass State. The Lexington facility has teamed with Marshall Pediatric Therapy to offer both adults and children the only therapy in the world proven to stimulate brain growth through immersive technology. This experience has already helped patients

with traumatic brain injuries (TBI), stroke, concussion, Parkinson's, Alzheimer's, cognitive decline, ADHD, Dyslexia and more, regain measurable mental clarity and new motor function.

NeuroAnimation invites the public to join the open house events at their newest facility and witness live demonstrations of a technology that is changing lives. Whether it is a senior looking to "live again" and become a SuperAger, or a survivor recovering from a brain injury, or a child struggling with their own neurological hurdles, NeuroAnimation's immersive protocols are designed to make the journey to wellness feel like "wonder, not work."

"We chose Lexington because it is a community that values innovation and quality of life", said Dr. Omar Ahmad, CEO and Founder of NeuroAnimation. "Our mission is to move beyond traditional rehabilitation. We aren't just managing symptoms; we are using targeted vascular stimulation to help the brain repair itself. Our clients are warriors who are suffering and on a hero's journey to alleviate their suffering. We provide the instrument that helps them fight their

way back. In their fight, they inspire themselves and the world by demonstrating the power of the human spirit, hard work, and the right tool-NeuroAnimation. Our clients leave as ambassadors for hope for the whole world. Our expansion into Lexington is a major step toward our goal of national availability by 2027."

About NeuroAnimation

NeuroAnimation is an immersive, interactive therapy designed to help the brain heal itself. Using cutting-edge, motion-capture technology, it stimulates both cognition and movement. By engaging the whole body and mind, NeuroAnimation promotes neuroplasticity-the brain's ability to rewire, regrow, and recover.
