

Blockair's Blockchain-Based "Airplane Game" Model Emerges on BNB Smart Chain on April 1st

Blockair.io partners with blockchain-native venture capital firm Victus Global, who has joined as a strategic advisor

MEXICO, SPAIN, April 2, 2026

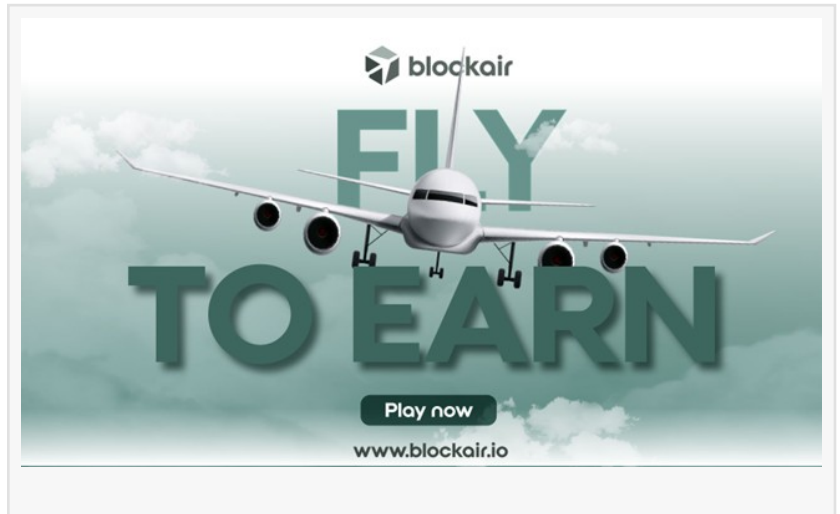

/EINPresswire.com/ -- As crypto

markets experience a downturn, developers continue experimenting with gamified financial models on-chain.

[Blockair.io](https://blockair.io) is reintroducing a variation of the long-known "airplane game" structure within a Web3 environment. Blockair is building a

smart contract-based system on BNB Smart Chain that applies a "fly-to-earn" mechanic. The

model allows users to progress through four sequential levels, with each cycle designed to return up to 4.4 times the initial participation amount, depending on progression and completion.

The system includes different entry tiers, which the project refers to as flight categories:

Domestic tier: 10 USDT entry

International tier: 40 USDT entry

Long-haul tier: 150 USDT entry

According to the project, users who complete all four levels can restart the process, creating a cyclical participation structure.

Blockair is also a part of the Strategic Advisory program with Victus Global, a 360 Web3 growth company.

Access to the platform requires a "Blockair Passport" NFT, which functions as a user identifier within the system. The team has opened a whitelist phase until 31/03, during which these NFTs can be minted without cost, ahead of the official launch.

A test version of the platform is currently available on the BNB testnet, allowing users to explore the mechanics in a simulated environment prior to deployment on the mainnet.

The re-emergence of such models highlights a broader trend in crypto toward reinterpreting familiar financial or gamified systems using blockchain infrastructure. However, as with similar participation-based mechanisms, outcomes depend on user activity and system design, and prospective participants are generally advised to understand the mechanics and associated risks before engaging.
