

# Amazon Managed Cloud Service Market Report 2026 | Business Growth, Development Factors, Current & Future Trends till 2030

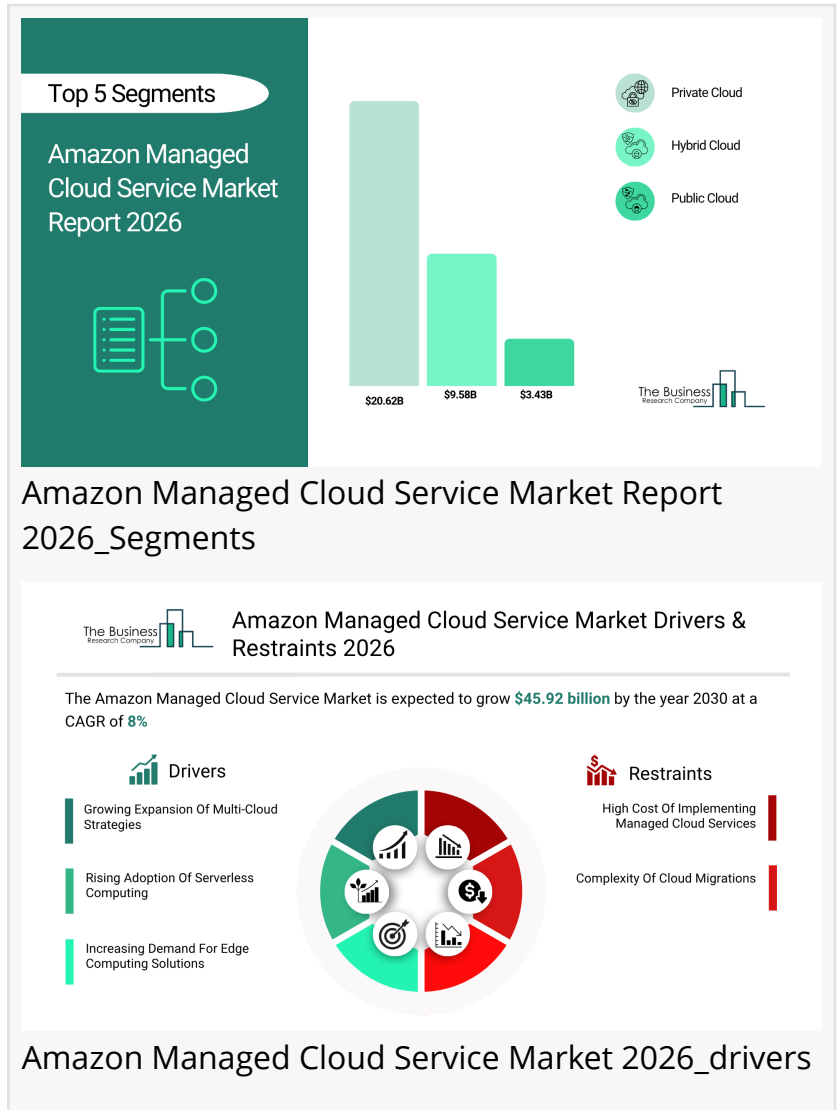

*The Business Research Company's Amazon Managed Cloud Service Market Report 2026 – Market Size, Trends, And Global Forecast 2026-2035*

LONDON, GREATER LONDON, UNITED KINGDOM, April 3, 2026

/EINPresswire.com/ -- "[Amazon Managed Cloud Service market](#) to surpass \$46 billion in 2030. Within the broader Information Technology industry, which is expected to be \$13,807 billion by 2030, the Amazon Managed Cloud Service market is estimated to account for nearly 0.3% of the total market value.

## Which Will Be The Biggest Region In The Amazon Managed Cloud Service Market In 2030

North America will be the largest region in the amazon managed cloud service market in 2030, valued at \$17 billion. The market is expected to grow from \$13 billion in 2025 at a compound annual growth rate (CAGR) of 6%. The strong growth can be attributed to increasing adoption of multi-cloud and hybrid cloud management strategies, strong ecosystem of certified managed service providers and cloud consulting partners, rising demand for automated cloud operations and DevOps integration, growing focus on cloud governance and workload optimization, and expansion of industry-specific managed cloud solutions tailored for sectors such as healthcare, finance, and manufacturing.

## Which Will Be The Largest Country In The [Global Amazon Managed Cloud Service Market](#) In 2030?

The USA will be the largest country in the amazon managed cloud service market in 2030, valued at \$16 billion. The market is expected to grow from \$12 billion in 2025 at a compound annual growth rate (CAGR) of 6%. The strong growth can be attributed to increasing adoption of cloud migration and modernization services for legacy systems, rising demand for managed disaster recovery and business

continuity solutions, strong focus on FinOps practices for cloud cost management, growing use of containerization and Kubernetes-based deployments, and expansion of managed services supporting edge computing and distributed cloud environments.

## What Will Be Largest Segment In The Amazon Managed Cloud Service Market In 2030?

The amazon managed cloud service market is segmented by service type into infrastructure as a service, platform as a service, and software as a service. The infrastructure as a service market will be the largest segment of the amazon managed cloud service market segmented by service type, accounting for 49% or \$23 billion of the total in 2030. The infrastructure as a service market will be supported by increasing demand for scalable and flexible compute and storage resources, rising adoption of hybrid and multi-cloud deployment strategies, growing need for cost-efficient and on-demand IT infrastructure, expanding use of cloud-based disaster recovery and backup solutions, increasing deployment of high-performance workloads such as AI and analytics, and continuous innovation in virtualization and cloud infrastructure management technologies.

The amazon managed cloud service market is segmented by deployment model into public cloud, private cloud, and hybrid cloud.

The amazon managed cloud service market is segmented by application into large corporation, and small and medium enterprises (SMEs).

The amazon managed cloud service market is segmented by end use industry into banking, financial services, and insurance (BFSI), healthcare, retail, information technology, and telecommunications, and government.

Amazon Managed Cloud Service Market Regional Share 2026\_Region

What Is The Expected CAGR For The Amazon Managed Cloud Service Market Leading Up To 2030?

The expected CAGR for the amazon managed cloud service market leading up to 2030 is 8%.

What Will Be The Growth Driving Factors In The Global Amazon Managed Cloud Service Market In The Forecast Period?

The rapid growth of the global amazon managed cloud service market leading up to 2030 will be driven by the following key factors that are expected to reshape multi-cloud management frameworks, serverless application development models, edge-to-cloud computing architectures, automated cloud operations strategies, and enterprise workload optimization across distributed cloud environments.

**Expansion Of Multi-Cloud Strategies** – The expansion of multi-cloud strategies is expected to become a key growth driver for the amazon managed cloud service market by 2030. Enterprises are increasingly adopting multi-cloud environments to avoid vendor lock-in, improve operational flexibility, and optimize performance across different workloads. Managed cloud service providers help organizations integrate and manage AWS environments alongside other cloud platforms, ensuring seamless workload migration, centralized monitoring, and enhanced security governance. Businesses are also prioritizing unified cloud management solutions to streamline operations and maintain consistent performance across distributed infrastructure. As enterprises continue to expand multi-cloud deployments, demand for specialized AWS managed services is expected to rise steadily. As a result, the expansion of multi-cloud strategies is anticipated to contribute approximately 2.2% annual growth to the market.

**Rising Adoption Of Serverless Computing** – The rising adoption of serverless computing is expected to emerge as a major factor driving the expansion of the amazon managed cloud service market by 2030. Serverless architectures allow organizations to build and deploy applications without managing underlying infrastructure, enabling faster development cycles, reduced operational complexity, and improved cost efficiency. Managed service providers are increasingly supporting enterprises in implementing serverless frameworks, optimizing AWS-based services, and ensuring reliable application performance. The growing popularity of microservices architectures and cloud-native development is further accelerating the adoption of serverless computing across industries. Consequently, the rising adoption of serverless computing is projected to contribute around 1.8% annual growth to the market.

**Increasing Demand For Edge Computing Solutions** – The increasing demand for edge computing solutions is expected to act as a key growth catalyst for the amazon managed cloud service market by 2030. Edge computing enables data processing closer to the source of data generation, reducing latency and improving real-time analytics capabilities for applications such as IoT, autonomous systems, and smart infrastructure. Managed cloud service providers are helping enterprises deploy and manage AWS edge computing solutions, ensuring efficient data synchronization between edge devices and centralized cloud platforms. The expansion of

connected devices and data-intensive applications is further strengthening the need for scalable edge-cloud integration. Therefore, the increasing demand for edge computing solutions is projected to contribute approximately 1.0% annual growth to the market.

What Are The Key Growth Opportunities In The Amazon Managed Cloud Service Market In 2030?

The most significant growth opportunities are anticipated in the infrastructure as a service market, platform as a service market, and software as a service market. Collectively, these segments are projected to contribute over \$16 billion in market value by 2030, driven by increasing enterprise adoption of cloud-native application development, rising demand for managed cloud platforms with integrated security and compliance capabilities, growing use of automation and orchestration tools in cloud operations, expanding deployment of AI and data analytics workloads on managed cloud environments, and increasing need for scalable, resilient, and cost-efficient cloud infrastructure solutions. This momentum reflects the growing shift toward cloud-first strategies, continuous modernization of enterprise IT environments, and the rising dependence on managed cloud services to enhance agility, performance, and governance across digital ecosystems.

The infrastructure as a service market is projected to grow by \$8 billion, the platform as a service market by \$5 billion, and the software as a service market by \$3 billion over the next five years from 2025 to 2030.

Learn More About [The Business Research Company](#)

The Business Research Company ([www.thebusinessresearchcompany.com](http://www.thebusinessresearchcompany.com)) is a leading market intelligence firm renowned for its expertise in company, market, and consumer research. We have published over 17,500 reports across 27 industries and 60+ geographies. Our research is powered by 1,500,000 datasets, extensive secondary research, and exclusive insights from interviews with industry leaders.

We provide continuous and custom research services, offering a range of specialized packages tailored to your needs, including Market Entry Research Package, Competitor Tracking Package, Supplier & Distributor Package and much more.
