

Sunstream Global Technologies to Showcase Advanced Engineering Capabilities at Hannover Messe 2026

Enabling Global Companies to Build Scalable High Performance Engineering Team in India. Electronics & Mechanical Engineering for Next Generation Product Design.

GERMANY, April 13, 2026

/EINPresswire.com/ -- Sunstream Global Technologies LLP, a trusted partner in high-value engineering services, is proud to announce its participation in Hannover Messe 2026, the world's leading industrial technology trade fair. Visitors can meet the Sunstream team at Hall 17, Stand A08/2.

At Hannover Messe 2026, Sunstream will highlight its deep domain expertise across a wide range of industries, including industrial systems, consumer products, automotive, energy, plant equipment, medical devices, and heavy machinery. The company will also present its proven model for enabling European organizations to establish and scale high-value engineering centers in India.

Sunstream brings strong capabilities in end-to-end product engineering, with specialized expertise in both electronics design and mechanical engineering. Its multidisciplinary teams support the full product lifecycle—from concept and architecture to validation and optimization.

Key capabilities include:

- [Embedded firmware development](#) and hardware design for intelligent, connected products

Where innovation meets collaboration. Join the Sunstream team at Hannover Messe 2026 to discuss the future of engineering. Find us at Hall 17, Stand A08/2

- Multiphysics engineering and simulation, including FEA and CFD analysis
- Advanced thermal management and reliability engineering
- [Expertise in PCB](#), signal integrity (SI), power integrity (PI), and EMC/EMI compliance
- [Mechanical design, structural analysis](#), and product optimization for complex systems

“Our focus is on delivering high-performance engineering solutions that combine deep technical expertise with scalable execution,” said Unni Mecheeri, Director of Operations at Sunstream Global Technologies. “We partner with global companies to build engineering centers in India that are not just cost-efficient, but also innovation-driven and aligned with their long-term product strategies.”

India’s rapidly growing engineering ecosystem offers access to highly skilled talent across domains such as electronics, mechanical systems, and digital engineering. Sunstream’s collaborative partnership approach ensures seamless integration, strong governance, and accelerated time-to-market for its clients.

Visitors to the Sunstream stand can:

- Explore industry-specific engineering solutions and success stories
- Learn how to establish and scale dedicated engineering centers in India
- Engage with experts in electronics, mechanical, and product engineering
- Discover best practices for global

About Sunstream Global Technologies LLP

Sunstream Global Technologies LLP is a leading engineering services company delivering high-value solutions across multiple industries. With strengths in electronics design, mechanical engineering, and digital product development, Sunstream enables global organizations to build scalable engineering capabilities and accelerate innovation.
