

ELECTE Releases AI Agent Upgrade and Advances Toward SOC 2 Compliance

New release introduces automated reporting and competitor analysis, alongside a roadmap toward SOC 2 Type I and II compliance.

MILAN, MI, ITALY, April 3, 2026 /EINPresswire.com/ -- [ELECTE](#) (ELECTE S.R.L.), an AI-powered financial analytics platform for small and medium-sized enterprises, today announces the release of a major platform upgrade introducing its [AI Agent](#), alongside the initiation of its SOC 2 Type I and Type II compliance process as part of a broader move toward enterprise-grade infrastructure and security.

Fabio Lauria, Ceo & Founder | Electe

Major Platform Upgrade: Introduction of AI Agent

ELECTE has released a significant upgrade to its platform centered around the introduction of an AI Agent designed to automate core analytical workflows.

This release marks a shift toward autonomous financial workflows powered by AI, while strengthening our readiness for enterprise adoption.”

Fabio Lauria

The AI Agent enables businesses to generate financial reports automatically from their data, continuously update analyses as new information becomes available, and monitor competitors through automated data collection and benchmarking.

The update expands ELECTE’s capabilities beyond traditional analytics tools, moving toward a system where reporting and analysis are performed continuously in the

background, reducing manual workload and accelerating decision-making processes.

The release builds on usage patterns observed across ELECTE's growing customer base and reflects a shift toward automation-first financial operations for SMEs and scaling companies.

Advancing Enterprise Readiness: SOC 2 Type I and II

As part of its next phase of growth, ELECTE has formally initiated the process to obtain SOC 2 Type I and Type II certification.

The compliance effort is aimed at strengthening the platform's security, data governance, and operational reliability standards, enabling ELECTE to better serve enterprise customers and organizations with stricter compliance requirements.

The SOC 2 roadmap includes the implementation and auditing of controls across security, availability, and confidentiality, aligning ELECTE with widely recognized standards for SaaS platforms operating in regulated and data-sensitive environments.

This step reflects increasing demand from larger organizations seeking to adopt AI-driven financial tools within structured compliance frameworks.

Product Direction

The introduction of the AI Agent represents a broader product direction focused on automation of analytical work.

ELECTE continues to develop additional capabilities that extend its platform across financial forecasting, operational analytics, and market intelligence, with further releases expected in the coming months.

The company's long-term objective remains consistent: enabling companies to access advanced analytical capabilities without requiring internal data teams or external consultants.

Statements

"This release marks a transition from analytics tools to autonomous systems," said Fabio Lauria, CEO of ELECTE. "With the AI Agent, we are reducing the operational burden of reporting and analysis. In parallel, advancing toward SOC 2 certification is a necessary step to support larger organizations adopting our platform."

About ELECTE

Founded in Milan in 2023 by Fabio Lauria, ELECTE develops AI-powered tools that enable growing companies to generate financial forecasts, automate data analysis, and produce visual reports without the need for in-house technical expertise or external consultants. The platform

serves SMEs across multiple sectors in Europe and internationally, with over 500 businesses onboarded and a newsletter community of more than 40,000 subscribers. ELECTE has achieved 278% platform growth and an 87% reduction in data processing time for clients. The company is a member of the World Wide Web Consortium (W3C) and a recipient of the Le Fonti Awards 2025 for Excellence in Innovation and Leadership in AI Solutions.
