

AI Search Crisis: 61% Traffic Drop Threatens Creators & Web Monetization – MyTSV.com Analysis

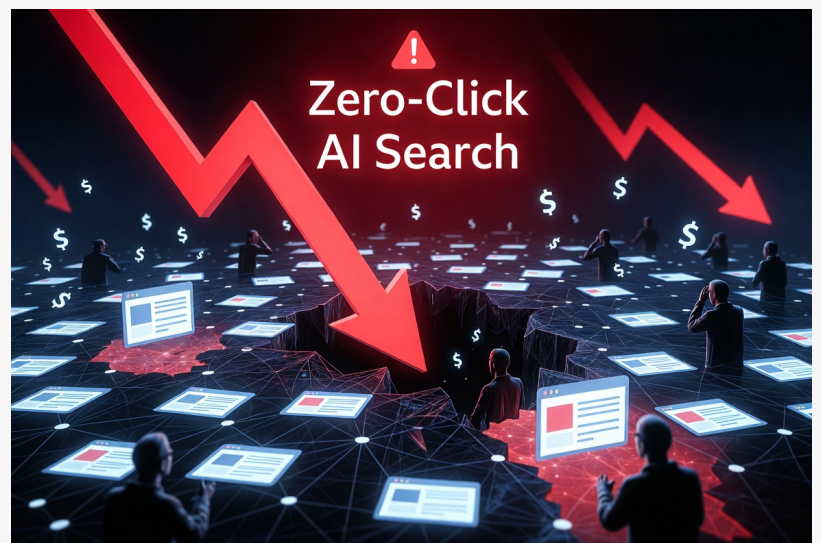

Generative AI Search's Long-Term Threat: Eroding Website Traffic, Creator Incentives, and Risk of AI Model Collapse – MyTSV.com In-Depth Report

DEERFIELD, IL, UNITED STATES, April 6, 2026 /EINPresswire.com/ -- MyTSV.com, the pioneering nationwide platform for trusted local services, reviews, ratings, and video guides, today publishes a timely, multi-faceted analysis of generative [AI search's profound impact on the internet ecosystem](#).

Titled “The Long-Term Impact of Generative AI Search on the Internet Ecosystem,” the report examines the sharp decline in [website traffic](#) and monetization, shifting incentives for content creators, the emerging risk of AI model degradation from synthetic data, proposed policy solutions, and future trends toward [subscription models and trust-based communities](#).

Key findings include:

- AI Overviews and zero-click search have caused organic click-through rates to plummet by up to 61% (from 1.76% to 0.61% in affected queries), with some publishers seeing 20–90% referral traffic losses and e-commerce sites reporting a 22% drop.
- While AI-referred visitors often convert at much higher rates (up to 23×), the overall volume collapse is undermining ad-supported models and independent journalism.
- A parallel “model collapse” risk looms as AI-generated content now comprises ~74% of new web pages, potentially contaminating future training data and eroding model quality by the mid-2030s.

The Zero-Click AI Search Crisis: 61% Traffic Drop Devastates Website Monetization Generative AI tools like Google AI Overviews and ChatGPT Search are slashing organic traffic and ad revenue for publishers and creators. This powerful visual from MyTSV.com'

The analysis critically evaluates solutions such as AI taxes, licensing agreements, and hybrid AI interfaces that guide users back to source websites, while projecting a shift toward subscription models, closed communities, and trust-based branding as the web fragments.

“Generative AI search is not just changing how people find information — it is reshaping the economic foundation of the open web, including local discovery platforms like ours,” said Aybek Izzatov, co-founder of MyTSV.com. “This report equips businesses, creators, and policymakers with the insights needed to adapt and thrive.”

MyTSV.com Mission and Concept

MyTSV.com was built on a clear mission: to revolutionize local search by connecting users with trusted “town specialists” through authentic video reviews, ratings, and guides. The platform’s core concept prioritizes “showing over telling” — users instantly see the quality, personality, and real-world experience of local service providers rather than relying on text descriptions alone. By blending community-driven transparency with nationwide coverage, MyTSV.com aims to restore trust and efficiency in local discovery at a time when traditional search is being disrupted by AI.

The full analysis, complete with citations to primary industry studies and data sources, is now live in the MyTSV.com Blog section:
