

Payment leaders share risk management strategies on B2B Vault: The Biz to Biz Podcast

Industry experts address rising chargebacks and evolving payment risks facing businesses

FORT LAUDERDALE, FL, UNITED STATES, April 7, 2026 /EINPresswire.com/ -- As chargebacks and payment disputes continue to rise across industries, leading voices in the payments space are sharing strategies to help businesses reduce risk and protect revenue on B2B Vault: The Biz to Biz Podcast, hosted by Allen Kopelman, co-founder and CEO of Nationwide Payment Systems.

Scott Adams Reveals the Chargeback Problem No One's Talking About

In a recent series of episodes, Kopelman brings together payment industry experts to discuss the growing complexity of chargeback management, fraud prevention and compliance, offering practical insights for business owners navigating an increasingly challenging payments environment.

“

Business owners don't need more noise — they need clarity. These conversations are designed to give them practical knowledge about chargebacks they can actually use.”

Allen Kopelman

“Chargebacks are one of the most misunderstood and costly issues businesses face today,” Kopelman said. “These conversations are about helping business owners understand the risks, the root causes and what they can do to better protect themselves.”

The featured episodes explore key topics including transaction monitoring, dispute mitigation strategies, evolving card network rules and the role of technology in reducing exposure to fraud and operational risk.

Across the discussions, industry leaders emphasize the importance of proactive risk management, clear billing practices and leveraging modern payment infrastructure to improve visibility and control.

"Many chargebacks can be prevented with better systems, better communication and better data," Kopelman said. "The goal is to shift from reacting to disputes to preventing them in the first place."

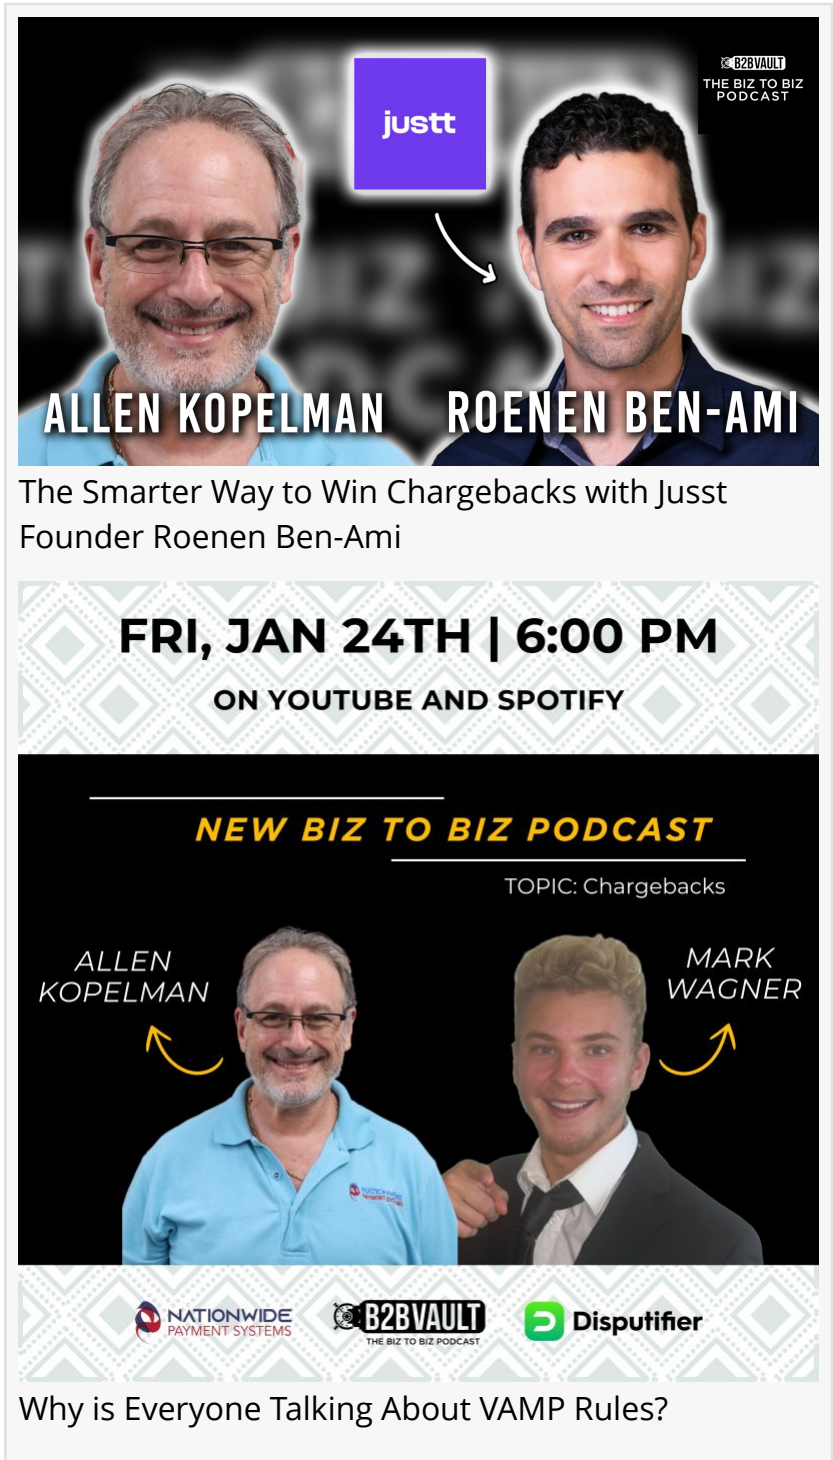

The episodes also highlight how businesses operating in high-volume or regulated environments face added complexity, making it critical to implement scalable solutions that support compliance, reporting and dispute resolution.

Hosted by Kopelman, B2B Vault: The Biz to Biz Podcast features conversations with entrepreneurs, executives and industry experts across payments, fintech and business operations. The podcast focuses on delivering actionable insights that help business owners improve efficiency, reduce risk and drive growth.

As payment technologies continue to evolve, Kopelman said education remains a key component of success.

"Business owners don't need more noise — they need clarity," he said. "These conversations are designed to give them practical knowledge about chargebacks they can actually use."
