

# Aqualume Launches Eco-Friendly Bottleless Water Cooler Hydration for SoCal Businesses

*Aqualume Redefines Southern California Workspace Hydration with Launch of Next-Generation Bottleless Filtration Systems and High-Capacity Ice Technology*

LOS ANGELES, CA, UNITED STATES, April 6, 2026 /EINPresswire.com/ -- Aqualume, Southern California's premier provider of advanced hydration solutions, today announced the regional rollout of its most comprehensive lineup of bottleless water filtration systems to date. Strategically designed to meet the rigorous demands of the California business climate—spanning the high-rise corporate offices of Los Angeles, the bustling medical plazas of Orange County, and the expansive logistics hubs of Riverside—Aqualume is setting a new gold standard for workplace sustainability, employee wellness, and operational efficiency.

As California moves toward more aggressive plastic-reduction goals, the traditional "3-to-5-gallon jug" model has become an obsolete relic of the past. Aqualume is leading the charge in this transition, offering an ecosystem of high-tech hydration stations that connect directly to municipal water lines, utilizing medical-grade filtration to deliver an endless supply of pure, pH-balanced water.

Addressing the Southern California Water Crisis through Innovation

"Business owners in Southern California are facing a triple threat: rising operational costs, a growing demand for eco-friendly practices, and a hot climate that makes consistent hydration a

Water Solution for sustainability for service industry in Orange County

workplace necessity," said Sami, Lead Social Media Manager and spokesperson for Aqualume. "With the launch of our new flagship models like the Glacier and the Cascade, we aren't just delivering water; we are delivering a smarter, cleaner, and more cost-effective way to run an office. We are eliminating the 'hidden' costs of bottled water—the carbon footprint of delivery trucks, the physical risk of workplace injuries from lifting heavy jugs, and the wasted real estate used for bottle storage."

Option for businesses to switch from sparkletts to bottleless solution

### The Aqualume Product Ecosystem: A Model for Every Industry

Aqualume's 2026 lineup is engineered to serve a diverse range of Southern California industries, from tech startups in Silicon Beach to manufacturing plants in the Inland Empire.

#### 1. The Glacier: The Flagship for Unlimited Water & Ice

The Aqualume Glacier is the definitive choice for zero-waste offices that refuse to compromise on luxury. Beyond providing ice-cold, hot, and ambient water, the Glacier features an integrated high-capacity ice maker that produces the highly sought-after "chewable" nugget ice.

Target Market: High-end law firms, creative agencies, and hospitality suites.

Key Feature: Soft-ice technology that is as refreshing as it is satisfying, coupled with a high-output design that ensures your team never runs out of ice, even during the peak of a Southern California heatwave.

#### 2. The Cascade: The High-Traffic Powerhouse

Designed for the busiest environments, the Cascade Model is a high-capacity floor unit built to handle back-to-back refills without a drop in water temperature.

Target Market: Gyms, warehouses, and large corporate headquarters.

Key Feature: Rapid-chilling technology and a high-clearance dispensing area that accommodates large sports bottles and carafes.

#### 3. The Jetstream: Sleek, Compact, and Touchless

Space is a premium in Los Angeles real estate. The Jetstream is a space-saving tabletop dispenser that packs the power of a full-sized unit into a sleek, modern footprint.

Target Market: Dental offices, medical exam rooms, and breakroom countertops.

Key Feature: Fully touchless, sensor-activated dispensing. In a post-pandemic world, the Jetstream provides a hygienic, "zero-contact" solution that eliminates cross-contamination.

#### 4. The Gulfstream & Avalanche: Professional Reliability

The Gulfstream offers classic hot and cold performance with a focus on simplicity and reliability, while the Aqualume Avalanche focuses on heavy-duty ice production for environments where hydration and cooling are critical to employee safety.

#### The Technology Advantage: Beyond Simple Filtration

What separates Aqualume from standard water services is the depth of its proprietary filtration and sanitization technology. Every model in the Aqualume fleet is equipped with:

**5-Stage Reverse Osmosis (RO) Filtration:** While standard filters only catch sediment, Aqualume's RO systems strip away microscopic contaminants, including lead, chlorine, PFAS (forever chemicals), and dissolved solids, resulting in water that is purer than most bottled brands.

**UV-C LED Self-Sanitization:** To ensure the highest level of hygiene, Aqualume systems utilize UV-C light technology to automatically sanitize the internal water tanks and dispensing nozzles, killing 99.9% of bacteria and viruses without the use of chemicals.

**Sparkling Water Integration:** Recognizing the trend toward healthier alternatives to soda, Aqualume now offers models with built-in carbonation, providing crisp, filtered sparkling water at the touch of a button.

**Smart Tech Monitoring:** Aqualume systems are "smart-enabled," allowing the local service team to monitor filter life and system health remotely, ensuring that maintenance is performed proactively before a problem ever arises.

#### Economic Impact: A Win for the Bottom Line

For businesses in Riverside and the Inland Empire, where logistics and shipping costs continue to climb, the shift to Aqualume represents a significant ROI. By moving to a flat-rate monthly subscription, companies can save up to 30-50% annually compared to the fluctuating costs of bottled water delivery. Furthermore, Aqualume's energy-efficient designs (Energy Star certified) ensure that the switch doesn't lead to a spike in utility bills.

#### The 7-Day "Experience the Difference" Trial

To demonstrate its confidence in its product and local service, Aqualume is offering a 7-day free trial for qualified businesses throughout Los Angeles, Orange County, and Riverside. The trial includes a professional site assessment, a full installation of a premium model, and a week of unlimited purified water and ice—all with zero obligation.

"We know that once a team tastes the water from an Aqualume system and sees the convenience of never having to change a bottle again, they never want to go back," says Sami. "Our responsiveness and customer-oriented service are what define us. We are a local business serving local businesses."

#### About Aqualume

Aqualume is a Southern California-based hydration solutions company specializing in premium, bottleless water filtration and ice systems. Founded on the principles of sustainability and technological excellence, Aqualume provides tailored water solutions for the modern workplace. From high-capacity industrial units to sleek countertop designs, Aqualume is committed to delivering the cleanest, healthiest water on the planet while helping California businesses reduce their plastic footprint.
