

# Fenix Launches the E06R PRO RG, a Flat Flashlight with Green Laser and Red Light

*The E06R PRO RG adds a green laser and red light to Fenix's best-selling flat flashlight design.*

LITTLETON, CO, UNITED STATES, April 8, 2026 /EINPresswire.com/ -- [Fenix Lighting](#) has released the [Fenix E06R PRO RG Flat Flashlight](#), a new variant of the popular E06R PRO that replaces the red laser with a green laser and the UV light with two Red Light modes.

The E06R PRO RG retains the flat flashlight design that set the E06R PRO apart — a slim, pocket-friendly profile that eliminates the bulk and rolling of traditional flashlights. At 4.84" in length, the E06R PRO RG slides into a pocket, bag, or gear pouch without the awkward bulk of a round light, and stays put on flat surfaces without rolling.

The two key changes from the E06R PRO are the accessory lights. The green laser provides higher visibility for pointing and signaling — effective even in bright daylight conditions. The red light offers a dedicated mode for preserving night vision. Together, these additions make the E06R PRO RG a more versatile [everyday carry](#) option for users who depend on precision and low-light awareness.

Beyond those updates, the E06R PRO RG carries the full feature set of the E06R PRO. Maximum white light output is 1600 lumens with a beam distance of 525ft (160m). The light offers 20 total lighting modes, including five Spotlight levels, five Floodlight levels, Instant Turbo, Strobe, two Red Light levels, Green Laser, and five colorful Scene modes on the 3D light ring and tail. The independent spotlight and floodlight allow users to switch between focused throw and wide area coverage, or combine both for maximum Instant Turbo output. The Fenix E06R PRO RG Flat
