

IR Centers® and Orange County Urology Associates Partner to Launch Advanced IR Program

Partnership brings advanced embolization therapies and outpatient IR care to Orange County, with center opening planned for 2026.

ORANGE COUNTY, CA, UNITED STATES, April 9, 2026 /EINPresswire.com/ -- [IR Centers®](#) and Prostate Centers USA® are pleased to announce a new partnership with [Orange County Urology Associates](#), a leading urology practice in Southern California, to develop and launch an advanced

outpatient interventional radiology (IR) program. This collaboration represents a significant expansion of minimally invasive treatment options for patients across Orange County and further strengthens IR Centers' growing national footprint in urology-integrated outpatient care.

“

Orange County Urology Associates is very happy with their partnership with IR Centers® and looks forward to opening their center in 2026.

”

Caroline Yacoub, MHA, COO

Orange County Urology Associates is recognized for delivering comprehensive, patient-centered urologic care, with a strong emphasis on clinical excellence and innovation. The integration of interventional radiology into its care model will enhance the practice's ability to offer cutting-edge, minimally invasive therapies within a streamlined outpatient setting.

The IR Centers program will introduce advanced embolization therapies and image-guided procedures as alternatives to traditional surgery for conditions such as

benign prostatic hyperplasia (BPH), chronic pelvic pain, hemorrhoidal disease, and musculoskeletal conditions. Patients will benefit from coordinated care pathways that integrate diagnosis, treatment, and follow-up within a single physician-led environment.

Caroline Yacoub, MHA, Chief Operating Officer of Orange County Urology Associates, commented on the partnership:

“Orange County Urology Associates is very happy with their partnership with IR Centers®. Our contracting was easily explained and negotiated well, architectural and construction discussions were fruitful and informative, and our implementation thus far has been extremely well structured with a professional team. The process has been very pleasant for my entire team. We can't wait for our center to open in 2026.”

Dr. Sandeep Bagla, Chief Executive Officer of IR Centers® and Founder of Prostate Centers USA®, emphasized the strategic importance of the collaboration:

“Our partnership with Orange County Urology Associates reflects our commitment to expanding access to advanced, minimally invasive therapies within leading specialty practices. Together, we are building a model of integrated, high-quality outpatient care.”

The partnership combines Orange County Urology Associates' strong regional presence and clinical expertise with IR Centers' national infrastructure in program development, clinical standardization, and operational execution. IR Centers' platform includes advanced procedural protocols, radiation safety optimization, outcomes tracking, and a national quality framework designed to ensure consistency and excellence across its growing network.

As part of the implementation, both organizations will focus on accreditation and licensing, physician expertise, staff education, and engagement initiatives to support a successful center launch, anticipated in 2026. The program is expected to significantly improve access to minimally invasive therapies for patients across Southern California while enhancing efficiency and continuity of care.

Together, IR Centers® and Orange County Urology Associates are advancing a shared vision of delivering innovative, patient-centered, minimally invasive care—grounded in safety, precision, and clinical excellence.
