

# Entrinsik Names Ferrilli as Implementation Partner for Enrole Platform Ahead of Workforce Pell Launch

*Partnership expands Continuing Education and Workforce Development capacity as Pell Grant begins July 1*

RALEIGH, NC, UNITED STATES, April 9, 2026 /EINPresswire.com/ -- [Entrinsik](#), developer of the Enrole online registration platform for Continuing Education and Workforce

Development, today announced that [Ferrilli](#), a technology services provider dedicated to higher education, has been named an official Enrole implementation partner.

Entrinsik Names Ferrilli as Implementation Partner for Enrole Platform Ahead of Workforce Pell Launch

The partnership comes as institutions prepare for the launch of the federal Workforce Pell Grant program on July 1, 2026. Established under the One Big Beautiful Bill Act signed into law in July 2025, Workforce Pell extends Pell Grant eligibility to short-term, workforce-aligned programs for the first time. The Pell Grant program is the largest federal source of need-based student aid, serving approximately 6 million students annually. Under the new provisions, qualifying programs must align with high-skill, high-wage or in-demand occupations as determined by state workforce boards, creating new compliance and data-reporting requirements for participating institutions.

“

Institutions aren't just looking for software; they're looking for proven partners who can help them transform how CE and Workforce Development programs operate”

*Brad Leupen, chief executive officer of Entrinsik*

These federal investments arrive at a time when institutions are already experiencing a fundamental shift in who they serve and how. As AI and automation reshape the workforce, demand for reskilling, upskilling, and retooling programs has accelerated across industries and communities. Adult learners, career changers, and incumbent workers are driving enrollment growth in CE and Workforce Development programs, and large college systems in particular are looking for scalable infrastructure to manage that growth. Workforce Pell amplifies these trends by opening new funding pathways, but the underlying need for modern, purpose-built

registration and enrollment systems has been building for years.

For many colleges, meeting those requirements will mean upgrading how they manage noncredit programming. According to UPECA's annual State of Continuing Education research, less than one-third of institutions reported that staff could easily access real-time enrollment data for their CE programs, and nearly half of respondents did not know their total continuing education enrollment numbers. The Enrole platform, paired with Ferrilli's implementation expertise, is designed to address those gaps.

"Becoming an Entrinsic Enrole services implementation partner is an exciting milestone that reflects our shared commitment to supporting colleges as they expand workforce development and continuing education opportunities," said Robert Ferrilli, president of Ferrilli. "With Workforce Pell creating new pathways for learners to access high value, career aligned programs, these implementations are critical to helping institutions scale noncredit offerings with confidence, compliance, and impact. By pairing Entrinsic's Enrole platform with Ferrilli's deep implementation expertise, we're empowering colleges to meet workforce demands while delivering meaningful outcomes for students, employers, and the communities they serve."

Ferrilli brings nearly 25 years of higher education technology expertise to the partnership, with deep experience across Ellucian, Workday and other enterprise platforms. The company's track record in complex, mission-critical system deployments positions it to support the technical and functional requirements specific to CE and Workforce Development implementations.

"Our partnership with Ferrilli reflects where the market is headed. Institutions aren't just looking for software; they're looking for proven partners who can help them transform how CE and Workforce Development programs operate," said Brad Leupen, chief executive officer of Entrinsic. "Ferrilli's expertise, combined with Enrole, gives institutions exactly that. We're excited to formalize a relationship that's going to help a lot of colleges modernize critical operations."

The partnership is effective immediately. Ferrilli is now available to support new and existing Enrole deployments.

Representatives from both companies will be at Ellucian Live 2026 in Denver, April 19-22. Visit Entrinsic at booth 430 or Ferrilli at booth 530, or contact either company to learn more about modernizing Continuing Education and Workforce Development registration systems.
