

Propper AI and CLEAR Enable Seamless Identity Verification for Digital Agreements

The Propper AI platform leverages CLEAR's secure identity platform (CLEAR1) embedded trusted biometric verification directly into their agreement signing flow.

DENVER, CO, UNITED STATES, April 9, 2026 /EINPresswire.com/ -- [Propper AI](#) and CLEAR (NYSE: YOU), the trusted security identity company, today announced the launch of a powerful new identity verification solution designed to transform how businesses and consumers execute and manage digital agreements across the United States. The partnership, which began earlier this year, combines CLEAR's industry-leading biometric technology with Propper's Intelligent Agreement Management platform to deliver an experience that is faster, more secure, and easier than anything previously available in the market.

Propper x CLEAR delivering embedded identification to the Propper agreement workflow

A New Standard for Secure Digital Agreements

The Propper AI platform leverages CLEAR's B2B secure identity platform, CLEAR1, embedding trusted biometric verification directly within the Propper AI agreement signing flow. For the first time, businesses can offer their customers a seamless, high-assurance identity verification experience without interrupting or complicating the agreement process. The partnership marks a significant milestone in addressing one of the most persistent challenges facing organizations today, like how to maintain rigorous security standards while delivering a frictionless, user-friendly experience amid an escalating tide of identity fraud.

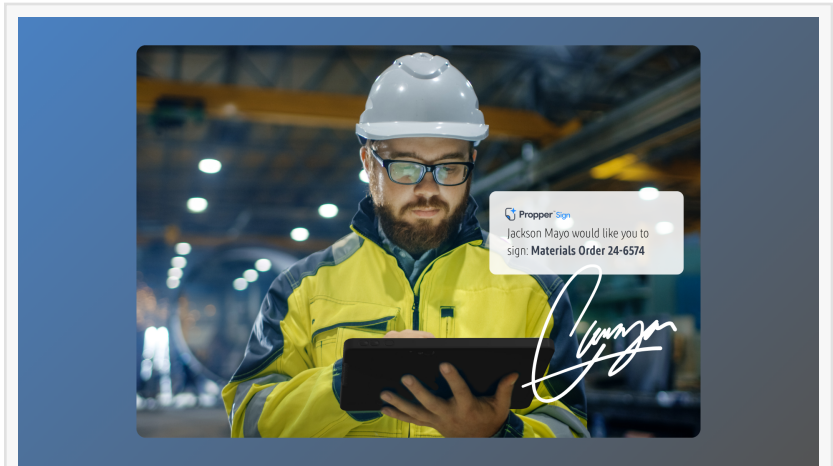

With the addition of OneID in the UK (and soon others across the EU and APAC), the Propper AI platform now delivers trusted biometric identity verification across both the U.S. and EU,

establishing a truly global standard for identity in digital agreements.

The Escalating Threat of Identity Fraud

Identity fraud isn't just growing, it's accelerating. Generative AI has supercharged the production of fake digital documents, and the hiring process is firmly in the crosshairs: Gartner® projects that "one in four candidate profiles worldwide will be fabricated by 2028"¹. For businesses, the damage is far from abstract.

Identity fraud drains millions from organizations every single year. The case for fast, secure, and reliable identity verification has never been stronger.

Propper Locker combined with Propper Sign drives business efficiency

“

Integrating Clear brings seamless identity and trust into every agreement, transforming Propper Sign into a unified platform for verification and execution.”

Greg Alger, CTO of Propper

"Together with CLEAR, Propper is ensuring that businesses of all sizes don't have to choose between agreement security and a world-class experience for their customers and agreeing parties," said Jack Berube, CEO of Propper AI. "The inclusion of CLEAR, combined with OneID in the UK, enables our industry-leading Intelligent Agreement Management platform with trusted and familiar biometric verification, setting a new standard for identity verification in digital agreements in the US and EU."

Eliminating the Security vs. Convenience Trade-Off

For too long, businesses have been forced to choose between protecting against fraud and delivering a smooth customer experience. Propper and CLEAR are eliminating that trade-off entirely. By embedding CLEAR's biometric verification natively within the Propper Agreement Management process at the precise moment of signing, organizations can now confirm identity with real-time confidence, without adding friction, delays, or complexity for the customer. Security and simplicity are no longer in conflict; with this solution, they work in concert.

"Integrating Clear brings seamless identity and trust into every agreement, transforming Propper Sign into a unified platform for verification and execution." - said Greg Alger, CTO of Propper AI

An Effortless Experience for Every User

The solution is designed to meet users wherever they are. With over 33 million members already on CLEAR's platform, the majority of users will recognize and trust the experience immediately. Existing CLEAR members can verify their identity with a single selfie — directly within the

Propper signing flow. For those new to CLEAR, creating a free account takes less than 90 seconds, ensuring that no user is left behind and no agreement is delayed. The result is a universally accessible, biometrically secured experience that raises the bar for what digital agreement management can deliver.

The Future of Digital Agreements Is Here

Together, Propper and CLEAR are setting a new standard for how digital agreements are signed and managed, combining cutting-edge identity verification with a seamless experience that makes the process faster, safer, and smarter for businesses and customers alike.

The image shows a white dialog box with rounded corners. At the top center is a circular orange icon with a fingerprint symbol. Below the icon is the heading "Identity Verification Required" in bold black text. Underneath is a paragraph: "We work with CLEAR to provide a seamless, secure option to verify your identity." Below that is another paragraph: "Please click the button below to enter CLEAR's free identity verification flow if you wish to proceed." At the bottom center is a dark blue button with a white fingerprint icon and the text "Verify with CLEAR". Below the dialog box, on a light gray background, is the text "Propper makes signer verification a breeze with CLEAR!"
