

# TruePoint Systems Launches as a Unified Managed IT and Cybersecurity Services Provider

*TruePoint Systems launches with unified managed IT, cybersecurity, communications, and advisory services for growing organizations.*

LONGVIEW, TX, UNITED STATES, April 13, 2026 /EINPresswire.com/ -- [TruePoint Systems](#) officially launches today as a unified managed technology and cybersecurity firm built to deliver strategic clarity, operational stability, and long-term technology leadership for growing organizations.

TruePoint Systems represents the next stage in the company's growth. Many clients will recognize the legacy Inline Networks name, which built the foundation of the organization over many years. While the company remains under the same ownership, it

is entering this next chapter under new management led by CEO Stepp Sydnor. As the company's services expanded beyond traditional managed IT into cybersecurity leadership, communications infrastructure, and long-term technology strategy, the organization evolved into TruePoint Systems to reflect the broader expertise it now provides.

TruePoint Systems was formed in response to a fundamental shift in how businesses must approach technology. As infrastructure becomes more complex and cybersecurity threats grow more aggressive, companies can no longer rely on fragmented vendors or reactive support models. They require integrated oversight, executive-level guidance, and full accountability across their entire technology environment.

TruePoint Systems was built to provide exactly that.

By bringing together [managed IT services](#), cybersecurity protection, communications infrastructure, and strategic advisory planning within a unified operating model, the company

TruePoint Systems

TruePoint Systems was created to bring technology and security under one clear, accountable partner.”

*Stepp Sydnor, CEO of TruePoint Systems*

eliminates silos and delivers a more disciplined, proactive approach to business technology.

“Our clients need more than technical support,” said Stepp Sydnor, CEO of TruePoint Systems. “They need a partner who understands risk, growth, and operational continuity. TruePoint Systems was created to bring technology and security under one clear, accountable partner.”

TruePoint Systems provides:

#### Cybersecurity & Risk Management

Network security, endpoint protection, managed detection and response, compliance support, threat monitoring, employee security awareness training, and risk mitigation strategies designed to protect business operations and reduce organizational risk.

#### Managed IT & Infrastructure Services

Comprehensive IT support, help desk services, infrastructure management, cloud solutions, server and workstation management, backup and disaster recovery, structured cabling, hardware procurement, and proactive system monitoring.

#### Strategic Technology Advisory

A consultative approach to technology leadership that aligns IT strategy with business goals. Services include executive-level planning, infrastructure roadmap development, governance guidance, budgeting alignment, and long-term technology strategy designed to reduce risk and eliminate operational surprises.

#### Business Communications & Connectivity

Managed VoIP systems, network architecture, connectivity optimization, and scalable communication platforms that support operational continuity.

The company’s leadership and operations teams bring extensive experience across business IT services, managed security services, and infrastructure management. CEO Stepp Sydnor brings more than 26 years of business development experience in the IT industry, helping guide the company’s next phase of growth and client partnership. Existing client relationships and service agreements continue without interruption as operations align under the TruePoint Systems brand.

The launch positions TruePoint Systems as a long-term IT and cybersecurity authority for organizations seeking reliable technology support, proactive security oversight, and strategic business technology leadership.
