

FacialDx Offering Free Trials of Newly-Released Revolutionary Visual Biomarker Intelligence Software

New AI-powered platform transforms a simple facial scan into real-time wellness insights using a mobile phone or tablet camera.

ORANGE PARK, FL, UNITED STATES, April 13, 2026 /EINPresswire.com/ -- FacialDx announced the launch of its groundbreaking platform, introducing a new category in health technology: [Visual Biomarker Intelligence software](#).

Designed to deliver fast, non-invasive wellness insights, FacialDx enables users to assess key health indicators in seconds using only a standard smartphone camera.

Advanced Facial Screening for Wellness Indicators

FacialDx is Visual Biomarker Intelligence software—an advanced AI-driven system that analyzes over 13,000 subtle facial characteristics and over 150 biomarkers to provide objective, data-driven insights into overall wellness. By identifying patterns often invisible to the human eye, the platform empowers individuals and organizations to take a more proactive approach to health monitoring.

“

Your face reflects changes in your health over time. With FacialDx, users can finally track those changes objectively and consistently.”

Doug Benoit, CEO

“Healthcare is shifting toward early detection, continuous monitoring, and accessibility,” said a spokesperson for FacialDx. “FacialDx is Visual Biomarker Intelligence

software built to meet that demand—offering instant insights without the need for wearables, lab work, or invasive procedures.”

A New Approach to Preventative Wellness

FacialDx leverages advanced computer vision and machine learning models to evaluate facial

indicators associated with internal systems, including:

Signs of fatigue and cognitive strain

Indicators linked to liver and kidney stress

Hormonal and endocrine-related patterns

Potential neurological signals such as concussion-related changes

By transforming a quick facial scan into actionable data, FacialDx bridges the gap between how people feel and what their bodies may be signaling beneath the surface.

Built for Individuals and Enterprises

FacialDx is designed for both personal and professional use, with applications across a range of sectors, including:

Longevity and preventative health programs

Regenerative medicine clinics

Corporate wellness initiatives

High-performance and safety-critical professions

As Visual Biomarker Intelligence software, FacialDx enables continuous tracking over time, helping users monitor changes in their health and make more informed decisions.

Free Trial Now Available

To support widespread adoption, FacialDx is offering a free trial, allowing users to experience the platform firsthand. New users can create an account and begin scanning immediately using their mobile device.
