

Tosea AI Launches Zero-Hallucination AI Presentation Tool and Deep Parsing Engine for Professional PowerPoint Generation

Tosea.ai debuts a 3-layer parsing engine to eliminate AI hallucinations and layout errors, enabling seamless document-to-PPT conversion for elite professionals.

HONG KONG, HONG KONG, April 14, 2026 /EINPresswire.com/ -- Tosea.ai, today announced the global rollout of its [professional-grade AI presentation platform](#). Designed specifically for the rigorous demands of academia, finance, and legal sectors, Tosea.ai

moves beyond the generic summary approach of current AI tools by introducing a proprietary three-layer parsing pipeline that preserves the structural and analytical integrity of complex, long-form documents.

While most AI slide generators struggle with technical data or hallucinate when faced with long documents, Tosea.ai is built for accuracy. Its unique architecture can digest a 100+ page industry report and generate a high-fidelity slide deck in minutes, preserving the structural and analytical integrity that high-stakes professionals demand.

"Most AI tools today focus on the 'shell'—the aesthetics. But in high-stakes environments like a PhD defense or an investment committee meeting, the 'brain' matters more," said Torin Zhou, Founder of Tosea.ai. "We aren't just making Slides; we are building an Expression Operating System that ensures complex knowledge flows accurately and persuasively."

The Tech Behind the Logic

Tosea.ai's Model-Agnostic engine sits atop a three-layer proprietary pipeline:

- Layout Detection Model: Identifies physical structures including headers, footers, and complex table relationships.
- Vision-Language Model: Fine-tuned to interpret semantic information within charts and images.

- Logical Reconstruction Model: Ensures that cross-page arguments and logical chains remain unbroken.

This technical rigor addresses a long-standing industry pain point: the high-fidelity .pptx export. While layout shifts and font inconsistencies have historically plagued AI-generated slides, Tosea.ai achieves a breakthrough by ensuring every deck is natively compatible with Microsoft PowerPoint and Keynote.

Users can customize their own institutional templates, use integrated AI image generation for bespoke visuals, and engage with an AI assistant to refine slides iteratively. Beyond visual slides, Tosea.ai automates the synthesis of professional speaker notes, anticipating every stage of the user's presentation workflow.

To further streamline the presentation process, Tosea.ai has officially launched [Tosea Skills](#). This new feature allows users to directly invoke specialized AI capabilities within their workflow. By opening up these direct-access tools, Tosea.ai is moving closer to its vision of a fully integrated AI co-pilot for professional expression.

Since its soft launch, Tosea.ai has achieved remarkable organic growth, surpassing 15,000 registered users with zero advertising spend. The platform reports a conversion rate that nearly triples the SaaS industry average, with 40% of its user base originating from North America, Hong Kong, and Singapore.

The enhanced AI presentation platform is now available at Tosea.ai, offering professional users a reliable solution for converting complex documents into high-fidelity PowerPoint decks.

About Tosea.ai

Founded in 2025 and headquartered in Hong Kong, Tosea.ai is an AI technology firm dedicated to building the next generation of multimodal expression engines. With a core team from top-tier institutions like the University of Hong Kong, Beijing Institute of Technology, and the Chinese Academy of Sciences, Tosea.ai serves the global academic and professional elite.
