

# UK Businesses Navigating the Merged RDEC Scheme Now Have a Clearer Path Forward

*Catalyst Solutions launches streamlined platform to support companies through significant R&D tax relief changes*

LONDON, LONDON, UNITED KINGDOM, April 14, 2026

/EINPresswire.com/ -- Recent reforms to the UK's R&D tax relief system have introduced significant changes to how companies claim, making the support of experienced [R&D tax consultants](#) increasingly valuable for businesses of

all sizes. To address this, Catalyst Solutions, a firm operating across three international markets, has launched a redesigned website giving UK businesses improved access to guidance on claiming [R&D tax incentives](#) under HMRC's merged Research and Development Expenditure Credit scheme

The reforms introduced the merged RDEC scheme for accounting periods beginning on or after 1 April 2024 — a shift that has changed the landscape for businesses that previously claimed under separate schemes. The updated platform provides detailed information on the reformed relief landscape, covering eligibility criteria, qualifying expenditure categories, and the full claims process, helping businesses understand what relief is available and how to access it.

The site also outlines how Catalyst Solutions supports businesses at every stage of the claims process, from identifying qualifying activities and preparing technical narratives, to liaising with HMRC where required.

UK businesses investing in innovation can use the website to assess whether their activities may qualify for R&D tax incentives and understand the steps involved in preparing a compliant claim.

For more information on R&D tax incentives in the United Kingdom and how Catalyst Solutions can help, visit <https://catalystsolutions.global/rd-tax-incentives-uk>
