Officer*

with Quantiphi's next-generation data, AI and cloud engineering expertise to help organizations move beyond AI experimentation and achieve production-ready ROI. This will enable enterprises to quickly understand their existing environments, identify modernization opportunities and execute cloud migrations with greater precision and confidence.

“The technical synergy here is fantastic. Matilda Cloud automates the heavy lifting of environment analysis, which acts as a force multiplier for Quantiphi's advanced AI and data engineering teams,” Matilda Cloud Chief Technical Officer Rajesh Reddy said. “It's a powerful combination that seamlessly translates comprehensive environment insights

into actionable migration operations.”

“Today’s cloud programs are about building modern data and AI platforms that support innovation at scale,” Quantiphi AWS Global Leader Jim Keller said. “Through Matilda Cloud’s extensive migration assessment and tooling capabilities and Quantiphi’s AWS-powered data, AI and cloud solutions, we are automating cloud discovery, migration assessments and key migration processes to drive successful business transformation for our customers.”

The collaboration supports a wide range of Agentic AI-powered transformation initiatives, including cloud-to-cloud migrations, modernization of data platforms and databases and VMware migration strategies. These capabilities reduce uncertainty for organizations early in cloud programs and move forward with actionable plans grounded in a real data environment.

“Successful cloud transformation requires eliminating uncertainty early in the process,” Matilda Cloud Chief Revenue and Growth Officer Viren Balar said. “By combining our platform’s capabilities with Quantiphi’s specialized cloud engineering expertise, we are giving enterprises a clear, actionable path to drive their cloud strategies forward.”

Matilda Cloud and Quantiphi are working together to support organizations across both commercial enterprises and public sector organizations, where large and complex environments often require deeper discovery and assessment before modernization initiatives begin.

About Matilda Cloud

Matilda Cloud provides an AI-powered platform that supports cloud discovery, assessment, migration, modernization, and ongoing cloud operations. Designed for enterprises and service partners, the platform helps teams move from understanding complex environments to executing change with greater speed, control, and confidence. By combining application-centric discovery, executable planning, and policy-driven operations in a single platform, Matilda Cloud enables organizations to reduce risk, improve governance, and support long-term cloud initiatives across hybrid and multi-cloud environments.
