

The PicoWay® Treatment Now Available at Kaua'i MedSpa

Kaua'i MedSpa is the only Med Spa in Kapaʻa with this innovative treatment technology

KAPAA, HI, UNITED STATES, April 16, 2026 /EINPresswire.com/ -- Kaua'i MedSpa is proud to announce that they now offer the revolutionary [PicoWay®](#) from Candela. The PicoWay® was named the 2022 Aesthetic Awards Device of the Year and has been featured on the Today Show on NBC. Kaua'i MedSpa is the first clinic in Kapaʻa to incorporate this system into its state-of-the-art practice.

“

I have to say the PicoWay is a major step forward in treating skin imperfections.”

Representative from Kaua'i MedSpa

Meet the PicoWay® laser, intentionally designed to work from the inside out.

The PicoWay® system delivers high peak power and the shortest pulse durations for a non-thermal, photoacoustic effect that transforms skin from the inside out. This remarkably innovative PicoWay® laser can:

- Significantly improve acne scars and wrinkles with a series of quick, 15 to 20-minute treatments, with low to no downtime.
- Address a range of benign pigmented lesions with flexibility in depth and spot size.
- Treat a wide range of tattoos, including difficult-to-treat blue and green tattoos.

PicoWay® Resolve and PicoWay® Resolve Fusion are fractional, split-beam treatments available on the PicoWay® system. Click [HERE](#) to see a Resolve [Treatment](#) Guide with treatment videos to learn more about this popular, low-downtime treatment to address acne scars, wrinkles, and benign pigmented lesions.

“I am so excited to be the first in the Kapaʻa area to bring the PicoWay® system to my patients. I have to say the PicoWay is a major step forward in treating skin imperfections,” said a representative from Kaua'i MedSpa. “As soon as this device became available, I knew I had to have it for our office,” she added.

The PicoWay® laser treatment stimulates collagen at a deeper level by utilizing three distinct energy wavelengths to address specific skin concerns. In contrast, an IPL treatment employs a

wider range of wavelengths. While IPL can be effective in certain cases, it may not be as safe for darker skin types and does not stimulate collagen in the same manner.
