

Massive Kinetiks Contracting Expands National Healthcare Support Amid Rising Compliance Demands

HONOLULU, HI, UNITED STATES, April 17, 2026 /EINPresswire.com/ -- As regulatory enforcement and compliance expectations intensify across the United States, healthcare facilities face increased pressure to strengthen electrical reliability and life-safety programs. In response, Massive Kinetiks Contracting (MK), a Honolulu-based provider of integrated facility support services, has announced the expansion of its healthcare facility operations nationwide.

Healthcare systems currently operate in environments where electrical infrastructure and life-safety systems are tied to operational continuity. Recent trends in federal enforcement have placed emphasis on proactive compliance, documentation, and long-term system performance.

Massive Kinetiks Contracting provides integrated services across electrical systems, mechanical support, and fire protection disciplines. The company supports healthcare, federal, and commercial clients seeking compliance-focused solutions to manage operational risk.

Recent projects include electrical

reliability and arc flash program support for the Department of Homeland Security and the National Oceanic and Atmospheric Administration. MK has also provided life-safety compliance services for Veterans Affairs healthcare systems, including Pittsburgh VA Medical Center and Greater Los Angeles VA Health Care System.

“Healthcare facilities operate in environments where reliability and compliance are critical to patient safety,” said Michael M. Dillard, CEO of Massive Kinetiks Contracting. “Our focus is on delivering scalable solutions that meet regulatory requirements and support long-term system performance.”

A component of MK’s approach includes ensuring that clients retain full ownership and accessibility of critical program deliverables, including arc flash study data and system models. This allows facilities to maintain flexibility in managing infrastructure and ensures continuity in future compliance efforts.
