

# Houston ISD Recognizes Ereflect's Typesy as Approved Digital Learning Resource

*Recognition under Project 21-06-02-A expands access to digital literacy tools across classrooms.*

HOUSTON, TX, UNITED STATES, April 21, 2026 /EINPresswire.com/ -- eReflect Inc., an education technology company focused on digital literacy and learning solutions, announced that its keyboarding platform, Typesy, has been approved as a vendor for Houston Independent School District (Houston ISD) under Project Number 21-06-02-A, Instructional Curriculum Materials, Supplies, and Digital Resources.

Digital literacy is essential in modern education. Approval within Houston ISD gives educators access to tools that support structured skill development and clear visibility into student progress."

*Rick Mesias, Sales Director - South*

The approval enables schools across Houston ISD to access Typesy as part of their instructional technology resources, supporting the development of keyboarding proficiency and broader digital literacy skills among students at multiple grade levels. The designation reflects alignment with district standards for educational tools that enhance both teaching effectiveness and student outcomes.

[Typesy for Houston ISD](#) provides a structured approach to digital skill development through guided lessons, interactive exercises, and real-time performance tracking. The platform is designed to help students build essential computer skills, including typing accuracy and speed, while also strengthening overall digital fluency. Students can progress at their own pace, allowing for individualized learning experiences that adapt to different skill levels.

For educators, Typesy offers a range of tools that support classroom instruction and management. Teachers can assign lessons, customize curriculum content, and monitor student progress through detailed analytics and reporting features. These insights help educators identify areas where students may need additional support and enable more targeted, data-driven instruction.

The increasing integration of technology into education has made digital literacy a foundational skill for student success. From completing assignments to participating in online assessments, students are expected to engage with digital tools on a daily basis. Keyboarding, in particular, plays a key role in enabling students to work efficiently and communicate effectively in digital

environments.

The inclusion of Typesy in Houston ISD's approved vendor list highlights the district's commitment to equipping educators with practical and effective instructional resources. By combining curriculum flexibility with measurable outcomes, the platform supports both teaching goals and student achievement.

In addition to classroom-level implementation, Typesy can be deployed across schools or district-wide programs, allowing for consistency in digital literacy instruction. This scalability ensures that students across different campuses have access to the same foundational skill-building opportunities, regardless of their learning environment.

Educators and administrators interested in exploring Typesy can access a dedicated Houston ISD trial page here:
