

# EDocGen Launches AI-Powered Document Generation and New Salesforce App

MIDDLETOWN, DE, UNITED STATES, April 20, 2026 /EINPresswire.com/ -- [EDocGen](#), a document generation SaaS platform, has announced the launch of its new AI-powered features along with a dedicated [Salesforce app](#). The latest update further strengthens EDocGen's ability to help businesses create documents faster, improve efficiency, and enhance customer communication.

Recognized as one of the industry's fastest document generation engines, EDocGen has become a trusted solution for enterprises that require high-volume document creation with speed, accuracy, and reliability.

As businesses continue to rely on data for daily operations, EDocGen enables organizations to generate documents directly from structured data sources such as databases, CRMs, and enterprise applications. With the addition of AI, the platform now also supports document generation from unstructured data sources, offering a more comprehensive automation solution for modern business needs.

“

U.S. businesses continue to adopt smarter and faster ways of working. With our AI capabilities and Salesforce integration, teams can improve productivity and create better customer experiences”

*Murthy TS, Director - EDocGen*

The new AI capabilities allow users to automate document creation, maintain consistency, and manage large volumes of documents with ease from both structured and unstructured data sources. Teams can quickly generate contracts, proposals, invoices, and reports while ensuring

high levels of accuracy and brand consistency.

EDocGen has also introduced its Salesforce app, designed to support large-scale document

generation within the Salesforce environment. The USP of the Salesforce App is it avoids the Execution Governors and Limits. By shifting the processing load, it allows users to generate thousands of documents and automatically attach them to specific records in minutes—overcoming the traditional constraints of the Salesforce environment., enabling users to generate documents directly within the Salesforce environment. This integration allows sales and operations teams to work more efficiently by using real-time CRM data within a single platform.

#### Key Highlights:

Seamless Salesforce integration enabling users to generate, manage, and deliver documents directly within the Salesforce environment using real-time CRM data

Flexible data integration with CRMs, databases, and enterprise applications, allowing businesses to generate documents from multiple structured data sources

Multi-source document creation that combines data from different systems into a single, unified document for better clarity and efficiency

Office and Google Docs Supports high-fidelity document generation in PDF, DOCX, PPTX, and XLSX formats across both Microsoft Office and Google Workspace, helping maintain brand and compliance standards. Additionally, it offers seamless population of fillable PDF forms..

Scalable architecture designed to support high-volume document generation, making it suitable for growing businesses and enterprise-level operations

These new features support businesses in delivering better customer experiences, improving internal efficiency, and accelerating everyday operations.

EDocGen continues to serve industries such as finance, healthcare, insurance, legal, and enterprise services, where high-quality documentation plays a key role.

#### [About EDocGen](#)

EDocGen is an enterprise-grade, cloud-based document generation platform that enables organizations to create, manage, and deliver data-driven documents at scale. Designed for modern businesses, the platform transforms structured data from CRMs, databases, and enterprise applications into accurate, branded documents in real time.

With advanced template management and dynamic data integration, EDocGen ensures consistency, compliance, and control across all document workflows. Organizations can seamlessly generate proposals, contracts, invoices, and reports while maintaining strict brand and governance standards.

EDocGen supports high-volume, on-demand, and batch document generation, allowing

enterprises to handle complex documentation needs with speed and reliability. Its flexible architecture integrates easily with existing systems, helping teams streamline operations without disrupting established processes.
