

Desu Systems to showcase cross-division safety technologies at INTERSCHUTZ

Desu Systems will attend INTERSCHUTZ 2026 in Hannover, presenting a broad portfolio of safety technologies shaped by the most pressing challenges in the market.

BERGSCHENHOEK, NETHERLANDS, April 21, 2026 /EINPresswire.com/ -- [Desu Systems](#) will attend INTERSCHUTZ 2026 in Hannover with a full team presence, presenting a broad portfolio of safety technologies shaped by some of the most pressing challenges in the market today. From 1 to 6 June at Hall 12, Stand D07, the company will showcase solutions across its divisions, with a focus on methane emission monitoring, flame and gas detection, and kitchen fire protection.

The company's presence at this year's exhibition reflects growing demand for practical, high-performance safety systems that respond to both tighter regulatory expectations and rising operational risk. Across industries such as petrochemical processing, hydrogen production, wind energy, waste handling, aircraft hangars, tank storage, offshore infrastructure, and commercial kitchens, operators are under increasing pressure to improve safety performance while meeting changing technical and compliance requirements.

At the show, Desu Systems will present technologies relevant to a wide range of industrial environments and use cases. Featured solutions will include optical gas imaging systems for methane leak detection, quantification and monitoring, flame and gas detection technologies for hazardous areas, and suppression solutions for commercial kitchen environments. INTERSCHUTZ identifies fire prevention, safety and security among its core exhibition areas, which makes it a fitting setting for this broader cross-division story.

Among the highlights on display will be the Spectrex 20/20Q flame detector, alongside advanced

flame detection technologies based on innovative QuadSense detection. These technologies are designed to support faster response, stronger reliability, and dependable performance in demanding industrial conditions. Desu Systems' exhibitor listing also highlights its Sensia thermal imaging camera offering and Buckeye Kitchen Mister system as part of its INTERSCHUTZ 2026 presence.

"Across industry, the conversation around safety is becoming more urgent and more practical at the same time," said Emile Hippe, Managing Director of Desu Systems. "Companies are under pressure to improve detection performance, strengthen resilience, and respond to changing regulatory demands. Our role is to help them find technologies that are not only advanced, but also relevant to the realities they face in the field."

"Industrial safety decisions carry greater consequences than ever when systems fall short," said Ronald Verkroost, Founder and CEO of Desu Systems. "That is why detection and suppression technologies need to be chosen with a clear view of the risk, the environment, and the operational reality. At INTERSCHUTZ, we want to show solutions that answer those demands in a serious and practical way."

DESU Company Profile

What Desu Systems stands for:
Stock Expertise Speed

Operating areas:
EMEA region, Complex fire region, and India.

About us
Desu Systems BV is a global leader in advanced flame and gas detection and suppression solutions since 2005. Operating in over 60 countries, we specialize in cutting-edge technology and unparalleled expertise to protect lives and assets across diverse industries.

- Waste Handling
- Offshore Industries
- Food Processing
- Energy Storage
- Tank Storage Farms
- Hydrogen Production
- Gas Turbines
- Transformer Stations
- Aircraft Hangars
- Compressor Stations
- Refineries
- Aerospace Industry
- Hospitality
- Ammonia Production

Our divisions:

- Flame & Gas Detection
- Kitchen Fire & Hygiene Solutions
- OGI & Methane Emission Monitoring
- Special Projects

Our divisions:

Flame & Gas Detection
Catering to contractors, installers, distributors, traders, EPCs and fire protection companies, we are the Master Distributor and Channel Partner for industry-leading brands such as Spectrex. Our top-tier optical flame and gas detection solutions are designed for both hazardous environments and safe areas.

Kitchen Fire & Hygiene Solutions
As the Master Distributor and channel partner for the Buckeye Kitchen Mister system across EMEA and India, we supply superior automatic fire suppression solutions for commercial kitchens. These high quality systems are easy to install, providing a reliable and cost efficient solution for the Hospitality and Food & Beverage industries.

OGI & Methane Emission Monitoring
This division provides cutting-edge Optical Gas Imaging and Methane emission monitoring technology to end-users, primarily in the Benelux region. Our bespoke process, offers both sales and rental services to oil & gas players who are seeking high-precision measurement tools, in order to comply with the EU's Methane emissions legislation.

Special Projects
Recent global challenges have driven us to expand into the armored vehicle fire detection and suppression market in Europe. As countries modernize their armored vehicle fleets, we strive to meet the increasing demand for critical safety solutions in the defense industries.
