

# Sofema Online Introduces 'Enrol Now – Pay Later' to Address Aviation Training Audit Gaps

*Sofema Online Introduces "Enrol Now – Pay Later" to Address Aviation Training Audit Gaps*

SOFIA, BULGARIA, April 21, 2026 /EINPresswire.com/ -- Sofema Online has announced the implementation of its [Enrol Now – Pay Later \(ENPL\)](#) program, designed to assist aviation organizations in meeting immediate regulatory training requirements following audit findings.

## Addressing Regulatory Timelines

In the aviation industry, identifying a training gap during a regulatory or internal audit often requires a rapid response to maintain operational compliance. The standard procurement process, encompassing internal approvals, invoicing, and bank transfers, can often prove to be overly time-consuming.

The ENPL initiative is intended to decouple the administrative payment cycle from the immediate need for personnel training, allowing organizations to maintain their safety and quality standards without delay.

## Operational Framework

The ENPL program modifies the traditional enrolment timeline to facilitate faster corrective actions. By allowing access to training materials before the final settlement of fees, the program aims to close compliance gaps typically within a 24-hour window during operating hours.

The Standard Training Procurement process requires upfront payment, which leads to enrolment timing based on post-payment verification and course access within 3–5 business days, with audit evidence provided as a pending payment status. In contrast, the ENPL Program Process allows for a 30-day deferred settlement, enabling enrolment within 24 hours of a request and

immediate course access upon enrolment, while providing documented proof of enrolment for audit evidence.

## Impact on Quality Management Systems

For Quality and Safety Managers, the primary utility of the ENPL system lies in its application to support Corrective and Preventive Actions (CAPA). The ability to demonstrate that staff members have been enrolled in required modules - such as Human Factors, Fuel Tank Safety, or EWIS - allows for a documented response to audit non-conformities.

The program is structured to support the following operational requirements:

**Regulatory Alignment:** Enables immediate adherence to EASA, FAA, and other national authority mandates.

**Administrative Efficiency:** Bypasses initial financial bottlenecks that may stall safety-critical training.

**Fiscal Planning:** Provides a 30-day period for organizations to process payments through standard accounting cycles while training is already underway.

## About [Sofema Aviation](#)

Sofema Aviation provides web-based regulatory training for the aviation industry, focusing on EASA, FAA, and OTAR compliance. The ENPL program is part of its broader effort to provide flexible training solutions that align with the rigorous scheduling demands of aviation maintenance and operations environments.
