

# ECI Software Solution's Deacom Earns TEC Certification as Complete Manufacturing Solution

*Independent analysis finds that Deacom eliminates the need for multiple software systems, reducing complexity and cost for batch and process manufacturers.*

WESTLAKE, TX, UNITED STATES, April 22, 2026 /EINPresswire.com/ -- [ECI Software Solutions](#), Inc. ("ECI"), a leader in AI-powered, cloud-based business management software and services, today announced that its Deacom Enterprise Resource Planning (ERP) solution for batch and process

manufacturing has successfully completed the Technology Evaluation Centers (TEC) certification program in the ERP Evaluation Center. The evaluation finds Deacom strongly supports real-world manufacturing processes through a unified and comprehensive platform that minimizes the need for add-ons.

The analysis conducted by TEC reports Deacom meets the complete needs of batch and process manufacturers, offering a broad array of features and functions that surpasses its competitors. TEC further reports these capabilities help simplify finance and operations, enhance process continuity, and lessen the workload of managing multiple add-ons. Specifically, Deacom uses built-in, practical AI to automate accounts payable. By using data extraction to handle invoice entry, the system removes the need for manual typing, making financial operations faster and more accurate.

"Deacom was designed for the real needs of the manufacturers managing complex operations, and we are continually refining the solution and embedding Practical AI to best meet our customers' evolving challenges," said Sarah Hagan, President and COO at ECI. "Recognition from a highly respected firm like TEC reflects the substantial effort we have put into this product and reinforces our customers' decision that Deacom will support all facets of their business."

As a leading independent advisory firm, TEC helps organizations identify and select the best-fit

enterprise software to support their digital transformation. In their ERP Evaluation Center, prospective users can [compare Deacom's functionality](#) against certified competitors with TEC's comprehensive model of ERP for process manufacturing software.

In the report, TEC Principal Analyst PJ Jakovljevic writes, "Indeed, while most manufacturing and distribution ERP solutions deliver financials, sales, inventory, procurement, and manufacturing management, Deacom's footprint extends beyond the boundaries of traditional ERP solutions and includes tools for point of sale (POS), direct store delivery (DSD), e-commerce, maintenance, quality management, warehouse management, and more. In short, ECI Software Solutions' flagship ERP system is a comprehensive solution for businesses that obviates the need to purchase additional bolt-ons or add-ons."
