

# Burckhardt Compression wins several orders for LNG terminals in Thailand and Taiwan

*Burckhardt Compression has secured several orders to supply compressor solutions for LNG terminal projects in Thailand and Taiwan.*

WINTERTHUR, ZURICH, SWITZERLAND, April 23, 2026 /EINPresswire.com/ --

[Burckhardt Compression](#), a global leader in reciprocating compressor technology and systems, has secured several orders to supply compressor solutions for [LNG terminal](#) projects in Thailand and Taiwan. Across the two

terminals, the orders comprise a total of eight [Laby](#)® compressor units for boil-off gas (BOG) services and one for minimum send-of service, supporting safe, efficient and low-emission LNG handling in the region.

Laby compressor in LNG terminal

These orders demonstrate the continued demand for reliable, efficient LNG infrastructure in Asia-Pacific. We are proud that customers across these strategic LNG projects have selected our solutions."

*Andreas Brautsch, President  
Systems Division of  
Burckhardt Compression*

Supporting LNG terminal operations with efficient boil-off gas management

LNG terminals receive, store and regasify liquefied natural gas and must operate with increasing flexibility as demand and supply fluctuate. Compressors play a vital role in LNG terminal processes by handling boil-off gas (BOG) generated during storage at cryogenic conditions. With these new orders, Burckhardt Compression strengthens its position as a leader and trusted partner for LNG terminal operators in Asia-Pacific, delivering solutions designed for reliability, long service intervals and strong environmental performance.

Laby technology: oil-free compression and reduced emissions

For LNG terminal applications, Burckhardt Compression's Laby compressor technology is valued

for its contact-less, oil-free design and full gas-tight characteristics - supporting near-to-zero emissions and maximizing operational efficiency associated with gas handling. In addition, the solution is designed to support highest availability by longer service intervals and reduced maintenance effort in demanding, and dynamic terminal operations.

Burckhardt Compression AG

Andreas Brautsch, President Systems Division: "These orders demonstrate the continued demand for reliable, efficient LNG terminal infrastructure in Asia-Pacific. We are proud that customers across these strategic LNG projects have selected our solutions to support safe operations and strengthen energy supply security - while improving the environmental footprint of boil-off gas handling."
