

# SW North America Builds CNC Machining Momentum with Sales and Engineering Expansion Across Western and Central Regions

NEW HUDSON, MI, UNITED STATES, April 27, 2026 /EINPresswire.com/ -- SW North America, a leading supplier of horizontal multi- and single-spindle CNC machining centers, [automation](#), and complete system solutions, today announced the western and central expansion of its North American team with multiple new hires and internal promotions, showing a clear signal of the company's accelerated growth and commitment to serving manufacturers across the entire United States.

Key leaders that have recently joined or been promoted within SW include the following:

- Chuck Duckworth joins SW North America as Regional Sales Manager, covering Wisconsin, Iowa, Illinois, and Missouri. In this role, Duckworth will work closely with customers to deliver smart CNC machining solutions tailored to their specific manufacturing challenges.
- Creed Hayes comes on board as Regional Sales Manager for Texas, Oklahoma, and New Mexico. Hayes will help manufacturers across the region advance and optimize their production processes through SW's advanced machining technology.
- Marko Kozina has been promoted to Regional Sales Manager, now overseeing Washington, Oregon, California, Nevada, and Arizona. Kozina's promotion recognizes his contributions to the team and positions SW North America for continued success in a strategically important and growing western territory.

In addition to strengthening its sales and service leadership, the company has expanded its team with the addition of engineers, operations specialists, program managers, and service professionals. These strategic hires ensure the organization is well positioned to support increasing demand for customer service while successfully executing a growing number of new

projects.

“Growth like this means greater support for our customers, the manufacturers of American made products that are integral to numerous industries, like medical, automotive, aerospace, agriculture, and many others,” said Andrew Rowley, General Sales Manager at SW North America. “These leaders showcase our dedication to building the right team to meet the evolving needs of today’s leading manufacturers in every region we serve.”

These additions bring deep industry expertise and regional knowledge that will enhance SW North America’s ability to serve customers across the full lifecycle of their CNC machining investments, from initial consultation and system design to long-term support. Other recent highlights in SW’s growth include the following:

- Introduction of new machining technology such as the [BF 12-21D](#) twin-spindle machining center, designed for high-speed production of structural aluminum components.
- Expansion of automation solutions, including the modular [Mobile S-Cell](#) robot cell, which enables flexible, scalable automation across machining, washing, assembly, and logistics stations.
- Continued investment in digital manufacturing tools and turnkey system solutions, helping customers optimize production through plant simulation, integrated automation, and advanced multi-spindle CNC machining platforms.
