

# Flower Turbines Announces Special Distributed Energy Packages for Gulf States

*Flower Turbines Announces Special Distributed Energy Packages for Gulf States*

LAWRENCE, NY, UNITED STATES, April 27, 2026 /EINPresswire.com/ -- [Flower Turbines](https://www.flowerturbines.com/) Inc. announces a special set of off-grid small vertical axis wind turbine packages for the Gulf States. They are specially made to be more resistant to desert conditions.

The following page is dedicated to Gulf customers:  
<https://www.flowerturbines.com/gulfstates>

The CEO, Dr. Farb, said, "In light of recent events, even the energy-rich Gulf States are looking at energy not dependent on central systems. We offer a complementary product to solar, with some advantages."

Flower Turbines makes small wind turbines that are special in many ways. They are elegant, noiseless, efficient, bird-friendly, endure high speeds, and start at low speeds. The invention that makes them the most cost and space-efficient choice for a small vertical axis wind turbine is their patented "cluster" or "bouquet" effect; when placed close together properly, each one added to a group makes the whole group perform better. As few as 4 turbines together produce the electricity of 8 separate turbines.
