The 2026 Business Training and Education Awards reflect a growing focus on learning that supports real responsibilities and day-to-day performance. Across the sector, training providers are designing programmes that combine structured learning with practical application, helping individuals build confidence in leadership, decision-making, and professional practice. This includes leadership development programmes built around real workplace scenarios, as well as specialist training designed to support specific industries and roles.

A clear theme across this year's recognised organisations is the ability to make learning accessible and relevant. From flexible online delivery models and learning management systems to tailored programmes that reflect individual or organisational needs, training is increasingly designed around how people actually work. Many providers are also incorporating coaching, peer learning, and ongoing support to ensure that development continues beyond the initial training experience.

The awards also highlight the role of training in supporting wider outcomes across organisations and communities. This includes improving professional standards, strengthening compliance and safety, widening access to learning opportunities, and helping individuals build sustainable careers. Business Awards UK congratulates all winners and finalists for their contribution to raising the standard of training and education and supporting a more capable and confident workforce.
