

# Applied Energy Technology Corp Successfully Implements Rootstock Cloud ERP to Strengthen Planning and Support Growth

*AETC implements its ERP in Salesforce Government Cloud to meet stringent security and compliance requirements in regulated markets*

SAN RAMON, CA, UNITED STATES, April 28, 2026 /EINPresswire.com/ --

Rootstock Software, a recognized leader in cloud ERP for product-based companies, today announced that [Applied Energy Technology Corp](#) (AETC), a leading manufacturer of small explosive devices used in aerospace and defense, has successfully gone live on [Rootstock Cloud ERP](#). The deployment strengthens AETC's material requirements planning (MRP) capabilities, improves operational efficiency, and provides a scalable foundation for future growth.

“

With Rootstock ERP now live, we have stronger visibility into the operational drivers of our business — from material planning to labor allocation.”

*Albert Leon, CIO at HRD Aero Systems*

AETC, headquartered in Burton, Texas (<http://www.aesquibs.com/>), has over 45 years of experience specializing in the design and manufacturing of energetics, including explosive cartridges and other critical safety components. The company is committed to maintaining exceptional product reliability while scaling its operations and expanding its product offerings.

“With Rootstock ERP now live, we have stronger visibility

into the operational drivers of our business — from material planning to labor allocation,” said [Albert Leon, Chief Information Officer](#) at HRD Aero Systems, the parent company of AETC. “This insight is critical in a build-to-order environment like ours, where understanding true production costs and lead times directly impacts pricing, delivery, and long-term scalability. Rootstock gives us a strong planning foundation as we continue to grow.”

Because AETC operates in highly regulated markets, it requires a secure cloud environment aligned with its compliance needs. As such, the company deployed Rootstock ERP in Salesforce Government Cloud (<https://www.salesforce.com/government/cloud/>), ensuring the platform

supports U.S. government security and compliance requirements and operates with the highest levels of privacy, performance, and reliability.

Caroline Marty, SVP of Global Professional Services & Enablement

(<https://www.rootstock.com/about-erp-software-company/management-team/>) at Rootstock, commented on this customer's success: "AETC has expanded its product lines, moved into new markets, and increased production volumes. To support ongoing execution at this level, the company needed a robust operational backbone. By deploying Rootstock, they now have in place a modern ERP that delivers real-time insights and strengthens alignment across manufacturing, finance, and leadership teams. We're honored to support their team as they continue to innovate and deliver mission-critical products."
