90% 64mm(2.5) 40%

HANOVER, NH, UNITED STATES, May 5, 2026 /EINPresswire.com/ -- Hypertherm Associates, Inc., a leading manufacturer of industrial cutting and welding equipment, has announced the availability of its new MAXPRO200® FlushCut™ cutting tool. This innovative tool is designed to provide superior performance and efficiency in industrial cutting applications.

MAXPRO200 FlushCut is a D-shaped, high-speed cutting tool that offers a significant performance advantage over traditional cutting methods. It is capable of cutting through thick materials with up to 90% less force and up to 40% faster cutting speeds. The tool's design allows for a clean, precise cut with minimal burr formation, making it ideal for applications where accuracy and surface finish are critical. The MAXPRO200 FlushCut is available in a 64mm (2.5 inch) diameter and is suitable for a wide range of industrial cutting tasks.

Hypertherm Associates, Inc. is a leading manufacturer of industrial cutting and welding equipment. Andrew Mumford, Director of Sales, commented, "The MAXPRO200 FlushCut is a significant advancement in industrial cutting technology. It offers a clean, precise cut with minimal burr formation, making it ideal for applications where accuracy and surface finish are critical. This tool is designed to provide superior performance and efficiency in industrial cutting applications, reducing cutting forces and increasing cutting speeds. It is a true game-changer for industrial cutting operations."
